SOMETHING

COMES ALONG

THAT CAUSES

YOU TO

REFLECT
BEFORE

*Whether it was an exam, something that your significant other said, something you did
a special anniversary, every once in awhile something comes along that prompts you to*

REFLECTIONS

President George Washington expresses the desire to see a national university established in Washington, D.C. To that end, he left 50 shares of stock in the Potomac Canal Company for the endowment of such an institution

1790

Reverend Luther Rice, a Baptist minister, joins with friends to raise the funds needed to purchase land in the Nation's Capital, obtain a charter from Congress, and begin a college.

1819

On February 9, President James Monroe signs the Act of Congress chartering Columbian College. William Staughton is appointed president of the college, located on College Hill.

1821

Following the Battle of Bull Run, the U.S. government establishes a hospital in the Columbian College buildings to treat the wounded from the Civil War. Many students leave, most to their homes in the South.

1861

Columbian College's charter is amended to change its name to Columbian University.

1873

LECTURE

A university policy is established permitting the admission of women. The first women enrolled in 1888.

1888

The university moves from College Hill to the heart of the city, locating at 15th and H Streets.

1884

Columbian University becomes The George Washington University. The proposal arose from the George Washington Memorial Association which desired establishing a university named for the first president in the city of Washinton.

1904

The university is moved to it's present location at Foggy Bottom. The move was precipitated by heavy economic burdens that arose from its location at 15th and H.

1912

The George Washington University celebrates the 175th anniversary of its founding.

Finding a Home Away From Home

For both new and returning students, selecting housing presented a number of decisions. For most students, on-campus housing provided more than adequate accommodations. Students living in the residence halls had the benefit of housekeeping services, a service most college students can't afford on their own.

Residence halls had the appeal of a "college atmosphere." One could walk down the hall in the wee hours of the morning and find other students to discuss what they were planning to do over the weekend, how to do a homework problem, or other issues.

Within the residence hall system there were a variety of living arrangements avail-

able. In addition to the variety of room configurations, specialty floors brought together students with common interests in multicultural issues, performing arts, and other topics.

For freshmen, Thurston, also known as "the zoo" provided an exciting atmosphere where students could enjoy their newly acquired freedom. Students were confronted with new challenges, especially when it came to dealing with roommates. Agreeing on when the TV and stereo shouldn't be on and how to deal with overnight guests forced students to learn how to cooperate and compromise. Added to the mound of difficulties were the 24-hour courtesy hours that some

students were never able to grasp.

Eventually some students chose to move off-campus. Many resources were available to help them in searching for an apartments, rooms, and houses in the surrounding areas. When one lived was only limited by their budget and mode of transportation. The price of an apartment made living with a roommate a practical necessity. While a \$1000/month apartment may have been too much for one student, two students could live there and spend less on rent than they would in the dorms.

Regardless of where they lived, with or without roommates or close neighbors, the student's home away from home was a special place full of new experiences and challenges, and for many a time to remember.

Heavy demand for on-campus housing left many students without a place to live when the all-hall lottery ended. The university was committed to finding a place for them to live but allowed students who wanted to move off-campus to get their housing deposit refunded. It was hard to believe that when the class of 1996 first came to GW, quads in Thurston were triples and the system was so under-capacity that some people in fives (currently sixes) got away with as few as three people in the room.

WELCOME ABOARD

THE DEBUT OF THE CLASS OF 1999

The first cars arrived early to assure their place in line in front of Thurston Hall. All together, more than 800 freshmen moved in and it was definitely an all-day experience for some. After waiting in line to get room keys, the freshmen began their adventure up the dreadfully slow elevators and crowded stairwells.

The students who arrived later in the afternoon were forced to unpack their cars

and place their personal belongings on the sidewalk while they stood in line to check in. The whole process took some students more than three hours just to make it to an elevator. While parents and students waited patiently, there was a sense of anger and frustration. The beginning of the semester was just underway and for most, and the first few hours were spent in line.

LIGHTING THE WAY

Activities related to the 175th anniversary began with a boat trip on the Potomac to Mt. Vernon. On Sunday, August 27, a 450-member delegation cruised down the Potomac River to Mt. Vernon for a ceremonial wreath laying at Washington's tomb, an exchange of flags between GW and Mt. Vernon, and a private tour of the third floor of General Washington's home.

"We live in a very different world than that of President Washington, who first envisioned a national university in the nation's capital," said GW President Stephen Joel Trachtenberg. "No doubt he would be proud of the reality of today's thriving institution born of his vision."

Many of GW's faculty and staff members brought their families to join them on the 90 minute boat cruise down the Potomac. As the boat docked at Mt. Vernon, the delegation was greeted by the Resident Director of Mt. Vernon. President Trachtenberg laid a wreath beside President Washington's tomb and then the delegation observed a moment of silence.

The tour then proceeded on to General Washington's home and the delegation was able to visit the third floor, which is normally closed to the public. To conclude the day's ceremonies, a lantern, lit from Mt. Vernon, was passed on from delegate to delegate. This lantern was then used in GW's opening convocation the next day.

OPENING CEREMONIES

The Opening Convocation not only marked the beginning of the school year but also the beginning of the year-long celebration of the university's 175th anniversary. On August 28, President Trachtenberg was joined by John Washington, a fifth line descendant of George Washington, Mrs. Robert E. Lee IV, faculty, staff, and students of The George Washington University.

The opening ceremonies began with a processional march, followed by speeches, and culminated with the lighting of the 175th Anniversary cupola atop Stockton Hall. Also featured at the ceremony was the unveiling of a new banner for the Class of 1999, which is now placed in Thurston Hall.

Following the festivities, guests were invited to attend a special reception in the Marvin Center featuring authentic Mount Vernon fare. Guests received free t-shirts, posters, flags, and buttons. As the largest institution of higher learning in the nation's capital, GW reemphasized the importance of education. The 175th Anniversary promised to be an experience to be remembered.

President Trachtenberg throws the switch for the lights in the cuppola of Stockton Hall which remained lit throughout the school year.

Welcome Week

Juliana Hatfield performs to a sparse crowd on the Quad.

THE WILD WEST

HOW THE WEST WAS WON

Hopefully you remembered your boots and chew for the Wild Wild West Fest on Saturday, September 9, at high noon. Students would have definitely needed them to match the straw cowboy hat, sheriff's badge, and T-shirt which were given to the first two hundred arrivals. With papermâché cacti and wooden cows, the Quad looked its part as the setting for GW's Old West. Early fall felt more like late summer, and the smell of freshly cut grass, a barbecue, and farm animals (thanks to the petting zoo) lazed through the air. Even George Washington, a normally stoic figure in the Quad, donned a staff T-shirt and hat.

As pop music blared from twin speakers, attendees moseyed about trying out a variety of activities. First on their trail might have been the grill which boasted burgers and hot-dogs. Next they could enjoy cotton candy, snow cones, giant pretzels, and popcorn. To wash it all down there were plenty of Pepsi products (of course). To let their stomachs settle (ha!) a ride on the Ferris-wheel couldn't have been beaten, but don't fret, for stronger stomachs the tea cups and the zero-gravity room were there too. Finally realizing that they needed to slow down, they might've played horse-shoes, tested their aim at the dunking booth, or tried their arm at the strength gauge.

As promised, there was also live music. Up first were the heavy rock stylings of "Clouds" from Australia. After playing, the two lead singers sat in the crowd, had a

few sodas, and listened to the band that followed them: "Mr. Presidents." Their Reggae/Rap was the highlight of the day's festivities. As an interim between "Mr. Presidents" and the final act, "Q", a slightly overzealous but humorous and brave student, lip-synched and danced with a few in the crowd.

Finally, the day culminated at five o'clock with Juliana Hatfield. After playing a series of what seemed to be unexciting songs, performing in front of a slightly displeased GW crowd not impressed with her arrogant air, she left the stage. Most of the crowd quickly dispersed, but the few that stayed were treated to a three song solo performance by Hatfield who began by saying a few words to the effect that she "had" to play more or "the man" wouldn't pay. Apparently "the man," in this case, was the organizer of the event, the Program Board. Sources told *The Cherry Tree* that the Program Board reminded her of her contract which stipulated that she play until sundown. So as the Program Board cleaned up and the last imaginary tumble weed lazily rolled across the grass, Fall Fest '95 rode into the sunset.

And thus, Fall Fest '95 passed into history like so many other fun-filled Saturdays. When asked his opinion, one freshman in the engineering school said, "It was better than Physics," but for most it was more a day for a little fun in the sun, relaxation, and feeling their cotton candy tangle in their stomach on the tea cup ride.

When the verdict of not-guilty was heard, it sparked an emotional response among GW students.

From J Street and just about any other place there was a television, people awaited the verdict, guessing what the outcome would be. AT&T reported a 60% drop in long distance call volume during the 15 minutes during which the verdict was read telephone call.

And for a
moment

Everything just stopped

SOME PEOPLE PUT OFF GOING TO CLASS, OTHERS PUT a quick end to their telephone calls so they could concentrate, and elsewhere some classes stopped to tune into the year's most awaited announcement. With anticipation approaching a level unseen since the early days of America's Mercury and Apollo space missions, people brought a quick end to what they were doing so they could hear whether or not O.J. was going to walk.

For over a year, the trial of football hall of famer O.J. Simpson for the murder of his ex-wife Nicole Brown Simpson and her boyfriend Ronald Goldman occupied center stage in the news media and thanks to Court T.V. people at home were able to tune in for a motion-by-motion account of what was happening in the latest "Trial of the Century."

On a hot June night in 1994, someone murdered Nicole Brown Simpson and Ronald Goldman. In the following weeks Americans sat in their homes and watched O. J. Simpson and Al Cowlings lurch down a Los Angeles freeway in his white Bronco with the highway patrol hot on their tails in a low-speed chase that ended with O.J.'s arrest for the double murder. This began the saga of the most publicized murder trial in history.

Everyone had their own opinions and reasons for whether he did or did not do it. The trial might have been in California but its impact rippled all the way across the country to Washington, DC and the GW community. Just a few of the elements involved in this volatile alchemy were issues of race, celebrity status, money to hire an excellent defense team, and domestic violence. The impact of the trial could be seen in greater suspicion of the police and heightened racial tensions.

As sort of an icing on the cake, O. J. too, personally got involved in the whole macabre circus by putting out his book, *There Is Something I Want To Tell You*, that predictably shot to the top of the best sellers list. Also trying to ride the literary coattails to easy street was Cato Kalin, a witness in the trial who lived on O.J.'s estate. His book quickly found its way into the discount books bin.

Despite some people's feelings that his trial had gone on way too long and wondering why everyone was still beating the horse to death, academics realized why this trial had such staying power and so entranced the news and gossip insatiable nation. In a GW Communications class entitled, "Persuasion," that was all the professor basically harped and lectured about. The horse may have been long dead but that did not deter the rodents and tabloid junkies from dishing out story after story.

Now speed up over a year later; the first anniversary of the tragic death had come and past. Concern about a mistrial had been in the air for some time with 10 of the original 12 jurors dismissed by Judge Lance Ito, leaving only two alternates in what was beginning to resemble a courtroom version of 'survival of the fittest.' Just when people were beginning to think that the trial would never end, the defense rested case without calling O.J. to testify.

In her closing statement, lead prosecutor Marcia Clark recounted the forensic evidence including DNA tests that overwhelmingly point to Simpson as the killer and played down the errors they had made such as having O.J. try on the pair of gloves the killer supposedly wore only to discover they did not fit. A member of Simpson's 'Dream Team' of defense attorneys, Johnnie L. Cochran Jr. likened hate-spewing Los Angeles police detective Mark Fuhrman to Hitler and urged the predominately black jury to 'strike a blow against racism.'

Observers were expecting the jury to take days if not weeks to review the evidence from the 9 month trial before arriving at a verdict. They were stunned when the jury reached a verdict after less than four hours of deliberation. They may have only taken four hours to decide on the verdict but to keep the breathing hot, the verdict was not be announced until 1:00 pm the next day.

The reading of the not guilty verdict was met cheers, cries and speechless bewilderment. Chad Magaziner felt that O. J. should have been found guilty and since he wasn't, it was a disgrace. Frank Manja, a junior, said, "I'm expecting a white backlash and cuts in affirmative action and financial aid because no matter how people look at it, it did turn out to be a black and white issue." The Simpson jury was in but in the court of public opinion, the jury was still out.

O.J. Simpson winced and whispered 'thank you, thank you' as the jury read the verdict. afterwards he said, "I will pursue as my primary goal in life the killer or killers who slaughtered Nicole and Mr. Goldman. They are out there somewhere. Whatever it takes to identify them and bring them in, I will provide somehow. I would not, could not and did not kill anyone."

fashion SENSE

Walk around the GW campus and what can be seen are the kinds of clothes GW students wear when they are running late to a philosophy class, when they're about to give a formal presentation in a political communications class or on their way to meet friends at "J" Street for lunch. GW students dress to express themselves whether they realize the message consciously or unconsciously. One's attire says a lot about a person; it's one of the first and most salient things a person sees when meeting someone, aside from the face. The clothes one chooses is very revealing of the person that lies within. Ana Ayala said, "Clothes are very important in this day and age, because they say something about your personality whether it be conservative, innovative, creative, chic, good taste, sensual, sloppy. A person is usually judged by the clothes they wear."

While some may regard fashion as nothing but a waste and a pointless endeavor, junior Ana Ayala said, "As far as looks are concerned, I think that you are what you wear or at least that is what other people's perception of you is."

What kinds of style, fashion trends can sum the student body up best? While Oxford University and its students conjure up images of penny loafers and elbow padded tweed jackets for most people, such a single image cannot sum up the diverse students at GW and the fashions they sport. Francis Ramirez said, "Fashion-wise, I feel that GW's urban setting plays a big role in defining what people wear. For instance, in the 'traditional' university setting (such as rural UVA) many people opt for the 'preppy' look." There are the tres European trendy students, the sweats and sport apparel group, the jeans and sweaters people, etc. Students have reason for wearing the threads they do. Some to impress others, some to create a certain ambiance, others for

sheer comfort and low maintenance convenience. Others students dress because they want to feel good about themselves when they pass their reflection in the windows of the full length mirror of The Gap at 2000 Penn, a popular place to shop for most students due to the convenient location and mainstream style.

Fu-Lung Wu, a sophomore said that he, "just wears whatever is clean and within easy access in the morning. No hassles." Sociologist have observed for years that clothes are invariably part of the cliché scene but Francis Ramirez said that here at GW, "I don't think that clothes make the man. In each individual group that I encounter, I see counterparts in other groups."

Let's not forget the accessories and foot apparel that accompanies and helps to make an outfit complete, transform a mundane ensemble into an unforgettable eye-catching one. Students tote backpacks, shoulder bags, little micro backpacks that can only hold school supplies rather than books and still others choose to carry their heavy Physics and Mathematics texts in their arms.

Thousands of feet pound the streets and sidewalks of GW as students are rushing to and from class, to and from Gelman Library, and as the ancient proverb goes, "A great journey begins with a single step." So what are these collegiates wearing to make a pounding impression? Again the styles vary from platform heels to Doc Martens military style boots to penny loafers. There are also athletic sneakers and when the weather allows, students even sport sandals and flip flops.

While it may not matter as much while a student is still in college, clothes and their subliminal effect matters more when in the working world and especially during the all crucial interview. "You don't only have to know your stuff, but you must look like you do."

Beyond the numbers

TOUTED AS 'A HOLY DAY OF atonement and reconciliation,' by its sponsors, the Million Man March on October 16 was met with curiosity and anticipation. The presence of Nation of Islam leader Louis Farrakhan as the keynote speaker and the controversy surrounding him heightened the interest people had in the march.

Together with Benjamin Chavis, the deposed head of the NAACP, Farrakhan organized the march and put out the call for black men everywhere to come together in Washington as brothers to renew themselves and learn to take more responsibility for their families and communities.

Farrakhan's role as the leader of the march made many students apprehensive about what the march would bring. With a record of racist and antisemitic comments, Farrakhan was singled out among the day's speakers for his hateful and divisive rhetoric. Retired Gen. Colin Powell, arguably the most popular black man in America at the time, placed Farrakhan in the same category as former LAPD Detective Mark Fuhrman whose racism became an issue in the O.J. Simpson trial. In a speech delivered at the University of Texas earlier that day, President Clinton said "One million men do not make right one man's message of malice and division."

A tangible air of anxiety and anticipation blanketed the campus on the days that preceded the march. On the day of the march, the campus and surrounding area seemed to slow down to a crawl. Traffic was light and the day seemed more like a Sunday than a Monday.

Support for the black family was the most commonly cited reason for participating in the march with support for Louis Farrakhan being cited as a primary reason to march by only 5% of participants. However, 87% of the 400,000 largely middle-class participants had a favorable view of Farrakhan.

Throughout the day speakers from Mayor Marion Barry to professionals from all walks of life spoke on what black men should do to help rebuild their communities from taking responsibility as fathers to patronizing black-owned businesses. In the afternoon, shouts of "shut up and get Farrakhan up there" began to be heard.

Once he was up on stage, Farrakhan began delivering a fiery two hour long tirade against the ills of America. "We're not here to tear down America; America is tearing itself down," he said. Citing scriptures and numerology his disjointed speech meandered from issue to issue touching on racism, antisemitism, the responsibility of the black man, and responding to Clinton's speech.

Whether it had been a million man or 400,000 man march may have been important for the organizers, the marchers were more concerned with the message. They left Washington with the challenge to accept responsibility for their actions, to become more active in their community, and to be better fathers, brothers, and sons.

Curt Bergstrom

Curt Bergstrom

At the same time the speakers preached peace and unity from behind their bulletproof podium, an atmosphere of hatred towards whites could be detected in the audience. One woman was seen claiming that it was a private event and white people ought to leave.

Curt Bergstrom

Curt Bergstrom

Curt Bergstrom

Controversy continued long after Farrakhan's speech had ended and the last jumbo-tron television screen had been hauled away. This time it was the issue of whether it had really been a million man march. The U.S. Park Police estimate that only 400,000 people had attended the event was decried as an attempt by the white man to deny the black man his fair due. "This reminds me of plantation days when we would pick 100 bales of cotton and they would give us credit for 40 bales," said Chaves. Farrakhan threatened to sue the Park Police to force it to revise its estimates. Analysis by a Boston University researcher led to an estimate of 870,000 marchers. Farrakhan said he would not accept any estimate less than a million.

While the conference left a lasting impression on the new student leaders, it took a whole lot of energy out of them as well. Some students took naps during their lunch break to regroup for the afternoon activities.

The Virginia campus allows the students to get out of the city for the day. However, some kept looking at the clock to see when it would be time to go home.

Curt Bergstrom

Curt Bergstrom

Peter Vaill, former Dean of the School of Business and Public Management, gave the keynote address to the student leaders.

Curt Bergstrom

Curt Bergstrom

The Longest Day

Student organization leaders, advisors, and faculty members, assembled at GW's Virginia campus to discuss the changing roles of leadership. As more and more new students become involved in student activities, student leadership is essential to keep things running smoothly. This

conference teaches the new student leaders about the different types of fundraising projects, different leadership paradigms, and most importantly, introduces them to the other student leaders on campus.

email: @gwis2.circ. gwu.edu

A freshmen recently commented about e-mail, "Now that I have it, I couldn't imagine my life without it." E-mail, short for electronic mail, had been around for twenty years or so as a facet of the Internet. Almost all colleges, universities, businesses and government agencies, had their own network. Commercial networks like CompuServe, Prodigy, and America On-Line, were also networks on the Internet, for a fee.

E-mail had its advantages, the largest of which was speed. Fu-Lung Wu, a sophomore, said that, "It's sure is faster than the postal service," and junior Ana Ayala agreed that e-mail is very convenient. Most GW students took advantage of the e-mail offered by CIRC (Computer Information and Resource Center). Almost everyone had at least one e-mail account, if not more. All students, faculty, and staff are entitled to a GWIS2 account. The George Washington Law Center, the Colombian College, and the School of Engineering and Applied Sciences also had networks.

E-mail may be fantastic to newcomers but for many GW students, e-mail had lost its shine. Junior Antoine Frederick said that he has started to use it less now than when he first gained access to it. He noted, "It's lost its novelty for me."

Aside from using e-mail to communicate with other students at GW, students also used it to communicate with their parents back home and with friends matriculating at other colleges. Another pro for e-mail was that it was postage free and the chances of a message getting lost were much lower. The system would also tell you if something you sent did not reach the desired destination or party. Susan Tochtermann used e-mail to keep in touch with friends and co-workers she does not get a chance to see often. Ana Ayala pointed out, "It is almost as good as the telephone, fast, yet inexpensive."

Not everything about e-mail is a dream come true through. Just like anything else, there are cons. Some students had routinely received annoying chain letters. She found out that e-mail chain letters are taboos and in some cases illegal. At the very least, she could have had her account suspended. CIRC periodically sends

Kathy Neuschuba

a notice that anyone who received chain letters should forward them to the CIRC address. This all has to do with netiquette (etiquette on the net).

The privacy issue had many students concerned as well. Using GWIS2 meant that you have consented to having your e-mail monitored by CIRC officials. One student complained, "I think e-mail should be like a letter, private, and should belong to the person who wrote it, not to the company who pays for the service. It is personal."

Students voiced how it was sometimes hard to get logged on e-mail, especially at night when dialing into the system from off campus. Although there were some problems, there was some room for creativity, too. GW students created fancy signature boxes and made certain words like their names blink on and off. Francis Ramirez had a whole set of signature boxes he can choose from. For the winter holidays, he created an e-mail Christmas card that had a huge candle with a blinking flame.

No matter what your opinion of e-mail, the Internet, and GW's own networks were, they were here to stay. CIRC and the services it provides have become as common place as the Career Center or the Program Broad office. As computers change the way we live, work, and play, GW will, of course, be affected as well.

Battling prejudices with awareness

Every minority group has their own special day of recognition, celebration and education to the public. National Coming Out Day took place on October 11, 1995. It was a day for celebration for those who took part in the day's events here at GW. The Lesbian, Gay, Bisexual Alliance (LGBA) set up several tables with educational handouts and condoms on the Quad to catch people as they walked by to and from classes.

The purpose of National Coming Out Day was to show people that homosexuals do exist and that they are just like everyone else. The only difference is that they happen to be attracted to people of their own sex. While studies vary, it appears that one out of every ten people are homosexual, making for at least ten percent of population at GW.

For some National Coming Out Day was a chance to show their true colors, to quit hiding behind a facade and to come out of the closets. One student commented that for him, "It was a day to tell the truth, to get rid of the mask." Another student said that, "Even though coming out is a giant step, there are other obstacles that need to be dealt with but, we're here, we're queer, get use to it."

LGBA which organized the event is a student group on campus that serves to help the campus and its gay and bisexual students to deal with the challenges and discrimination that can occur from being a minority, even a silent one. National Coming Out Day is one of the events that LGBA organizes each year along with the Halloween Masquerade Ball and AIDS Walk.

People of all sexual orientations stopped by the table throughout the day to get stickers and have their hair sprayed with bright fluorescent colors. Some left with a lavender triangle on their heads. In addition to the tables heaped with material, the site also had the rainbow flag for the background prop and posters with politically charged statements such as, "Hate is not a family value," on them.

People are starting to be more educated on homosexuality and that has helped lessen people's fear of the once unknown. People have started to be more accepting and tolerant of one another and respecting of their differences. While homophobia still does exist, with each passing year, and each holiday that celebrates individuality, is a step forward towards equality for all.

Greggor Mattson, Danielle Lico, and Jason Anthony, pass out literature about homosexuality and during National Coming Out Day on the university quad.

When the warmer weather comes, many students find it relaxing to read a book or sit and talk with their friends on the benches outside Thurston Hall.

Many students meet at the Marvin Center for lunch or just to study.

These three students just relax in between classes and enjoy eating on the benches outside Thurston Hall.

Hanging Out

Spare time means hanging out and listening to some tunes on your walkman.

The University Quad was a popular place to read, eat lunch, or just get a tan.

A HELPING HAND

Students, in conjunction with the Neighbor's Project and Clean-Up Foggy Bottom, lend a hand to help clean up in historic Foggy Bottom. Jason Toney directs the group of students on tasks that need to be done, and with trash bags in hand, the work begins.

Clean-Up Foggy Bottom

Clean-Up Foggy Bottom

Clean-Up Foggy Bottom

Clean-Up Foggy Bottom

Clean-Up Foggy Bottom

Michael Murphy volunteers to help paint with the Neighbor's Project and Clean-Up Foggy Bottom. Mike is also a member of Alpha Phi Omega, the nation's largest co-ed service fraternity. Another projects many students volunteer for is Miriam's Kitchen, a local homeless food shelter located at the Western Presbyterian Church. Each Wednesday during the semester, about three students go to Miriam's at six o'clock in the morning to prepare food for the homeless men, women, and children of DC.

The Panhellenic Association in conjunction with Glamour Magazine staged a fashion show to raise money for Breast Cancer research.

Bill Clinton takes a licking but keeps on ticking

BILL CLINTON SURVIVED A YEAR of political beatings and still managed to be the uncontested Democratic nominee for president. His re-election campaign started off slowly, as Clinton didn't have anyone to campaign against within his own party. His reputation was helped by a series of popular measures and interventions, including the deployment of troops to Bosnia.

A help to the Clinton campaign was the shutdown of the Federal government, which most people blamed on the Republicans. A wave of anti-Newt sentiment further propelled Clinton. The feeling was that Republicans had gone too far in their conservative revolution.

Abortion once again played a major role. As an ban on partial-birth abortions gained tremendous support in the Republican congress, Clinton reaffirmed his commitment to the pro-choice movement by promising to veto any such ban.

The spectre of the Whitewater land deal continued to linger. In April, Clinton was questioned

under oath for 3 1/2 hours in the fraud and conspiracy trial of James and Susan McDougal, who were partners in the Whitewater real estate development. The testimony, videotaped at the White House, was to be presented in court by the defense.

Also continuing were investigations by the Senate and four independent counsels. In addition to the probe by Kenneth Starr into the Clinton's involvement in Whitewater and other matters, there were three other investigations into actions by members of the administration. Never before had an administration been subject to probes at one time. The toll of these investigations on the Clinton's was staggering. By the end of 1995, they had amassed almost \$1 million in unpaid legal bills.

Despite all the allegations, Republican spin control failed to turn the tide against Clinton. While Bob Dole was trying to make it into a campaign over who you can trust, the majority of American's didn't seem concerned about Clinton's problems with 56 percent supporting the president in April.

Emerging Victorious

THE FIELD OF REPUBLICAN CANDIDATES for president was vast, but Sen. Majority Leader Bob Dole emerged very early as the clear victor. Challenges to his campaign came from all directions, including Steve Forbes' flat tax, Pat Buchanan's right-wing politics, and Gov. Lamar Alexander's grassroots efforts.

Campaigning was somewhat low key on Dole's part; he ran on a conservative platform, with a leaning towards the middle. After losing to Pat Buchanan in the New Hampshire primary, it was unsure just who would prevail in the end. But Dole then swept primary after primary, decisively earning enough delegates by late March.

"I want to make America better. I want people to find jobs. I want poor people to find good-paying jobs to get off welfare," said Dole, outlining his conservative agenda. He went further to assail critics who claim he has no vision as "touchy-feely" liberals.

The next step for Dole was to begin attacking Clinton, as he had been doing for the duration of his nomination campaign. Traditional attackpoints included Dole's history as a war hero versus Clinton's record as a draft-dodger. Dole's attempts to improve his standing in the poles through White House-Capitol Hill stand-offs such as the one on the budget backfired and increased Clinton's lead in the polls.

1996 was not the first attempt at the presidency for Dole. After an unsuccessful run at the Vice-Presidency as Gerald Ford's running mate in 1976, he lost the bid for the Republican nomination in 1980 and 1988. Dole had high hopes that the third time will be the charm.

Powell says 'no thank-you'

THE BIGGEST MAYBE of the election season was unquestionably retired Gen. Colin Powell, a GW alum (MBA, '71). Powell's proximity to the military successes in the Persian Gulf, where he served as Chairman of the Joint Chiefs of Staff and appearance of possessing integrity (a quality seemingly missing in politicians) fueled his surge in popularity; people were soon clamoring to know Powell's stance on virtually every issue imaginable.

Gen. Powell's non-campaign was a mass of hope and speculation, with various groups popping up to support the reluctant candidate's bid for the presidency. On GW's campus, a group was formed that planned to support Gen. Powell "should he decide to run." Despite not knowing Powell's stance on major issues, his ratings soared — in one survey of the country's Re-

publicans, Powell trailed Bob Dole by only four points. The air of tension and anticipation was not at all suppressed by Gen. Powell, who remained conspicuously tight-mouthed and non-committal.

Members of the Dole and Clinton campaigns were able to breathe a sigh of relief on November 8 when Powell announced that running for president required a "commitment that despite my every effort I do not have for political life, because such a life requires a calling that I do not yet hear." For that reason he said he would not run for any elected office in 1996.

The series of events which surrounded Powell disappointed many, while angering others. But it could be said that it was one of the most energetic non-candidacies that anyone has ever waged.

On the evening of October 4, 1995, Hurricane Opal came ashore on Florida's Gulf Coast, packing sustained winds of 125 miles per hour. Before it was through, the storm had killed at least 20 people in four states and caused at least \$1.8 billion in damage.

On April 19, 1995, a car bomb exploded in Oklahoma City, destroying the Alfred P. Murrah Federal Building and killing scores of men, women, and young children. The force of the blast tore off the building's facade and sent it flying 50 feet across the street, where it slammed into another building. The blast had carved a crater 30 feet wide and shortly after the explosion scores of rescue volunteers came to help.

Shortly after the explosion, Timothy McVeigh, a Gulf War veteran, was arrested for carrying a concealed weapon. Two days later, he was recognized as one of the bombing suspects and was charged. Trial is pending.

Disaster Strikes

An Amtrak train derailed while crossing a trestle in a remote desert region in Arizona, 55 miles southwest of Phoenix. The crash sent four of its cars into the gulch 30 feet below and injured 70, killing one. The derailment was treated as a terrorist act as two notes near the site of the derailment asserted that the 'Sons of Gestapo' were responsible. The notes claimed the wreck was an act of retaliation against the FBI, Bureau of Alcohol, Tobacco and Firearms, and local police.

The leader of the Grateful Dead was gone. Jerry Garcia, guitarist, composer and singer, passed away on August 9, 1995, just eight days after his 53rd birthday. Deadheads mourned his great loss and the fallen leader's legend will remain in the music community.

On September 5, 1995, France resumed underground nuclear testing when it detonated a device under a remote atoll in the South Pacific. Worldwide protests preceded the nuclear test, and criticism from the world followed it. France's President, Jacques Chirac defended the tests, saying they would provide

information allowing France to conduct computer simulated tests in the future. On January 29, 1996, Chirac announced that France would halt all nuclear testing. "France will play an active and determine role for disarmament in the world and for a better European defense," he declared.

Peace agreement signed

WHAT SEEMED TO BE A PERPETUAL CIVIL war in what used to be Yugoslavia progressed significantly, as territory deals and cease-fire agreements were finalized and agreed upon. Largely through the assistance of American diplomats and negotiators, the various sides in the ethnic conflict were able to, in at least some areas move towards a return to ordinary living.

In November 1995, peace negotiations began negotiations in Dayton, Ohio to end the four-year war. Opening the negotiations was Secretary of State Warren Christopher who warned that future generations would not forgive the leaders who started the war if they failed to reach a peace agreement. The Dayton Peace Accords divided Bosnia into a Muslim-Croat federation, with 51 percent of the land, and a Bosnian Serb republic, with 49 percent. Not long after it was signed on December 14, 1995, American troops began to deploy to the region as part of a NATO peace-keeping mission. NATO replaced the United

Nations which failed to bring an end to Europe's bloodiest conflict since World War II.

Domestically, the largest issue was the President's desire to send peace-keeping troops into war-torn Bosnia and Croatia. He met heavy opposition from a Republican-led Congress, but soon had his way, as American forces deployed to the area, joining troops from other international allies. The United States adopted a sector of the region, as did the United Kingdom and France. The troops began an attempt at sustaining the peace, while local militia, land mines, and mujahedin (Islamic fundamentalists) played foil.

The mission of the 20,000 American servicemen was to enforce the peace agreement and help create conditions that would prevent war from re-emerging after they had pulled out in a year. It required that officers switch gears from operations where military issues took precedence to one in which civil issues were paramount. "I've trained for 30 years to read a battlefield. Now

you're asking me to read a peace field. It doesn't come easy," said Maj. Gen. William L. Nash, commander of U.S. forces in Bosnia. With remembrances of the army's experience in Somalia still in the minds of military leaders, they remained aloof to expanding their mission to such things as investigating war crimes and apprehending the culprits.

Meanwhile, Bosnians and Croats attempted to recover from the effects of the violent war — for example, most children did not attend school in several years, and many public buildings and facilities were left uninhabitable. In addition, they had to deal with rebels who refused to honor the cease-fire, making everyday life still quite a dangerous thing. Four months after the agreement had been signed, the Muslim-Croat federation began to show signs of falling apart. Ethnic cleansing, extortion, and house burning recommenced.

With the help of the peace-keepers from the United States and elsewhere, progress would hopefully be made, ending a way of life that made guns and barbed wire commonplace.

Redefining Hillary

"What do Bill and Hillary Clinton have in common?"
 "They both think they're President."

Hillary Rodham Clinton had a rocky year, as she simultaneously received her highest praise and criticisms of her career. The First Lady's largest source of problems stemmed from the never-ending flow of questions and accusations relating to the suicide of Vince Foster, the Whitewater land deal, and the failed S&L which financed the project.

Mrs. Clinton was also heavily bashed for having what many see as an overly influential role in the Presidency. "President Hillary" jokes were in abundance, as the public viewed her as being the more powerful resident of the White House. Mrs. Clinton had a year of firsts, which included her being the first First Lady to ever be called to testify before a grand jury.

In a public relations comeback, however, the First Lady reaffirmed her self-appointed role as a model mother with the release of her book, *It Takes A Village*. Through a series of interviews, speeches, and book signings, Mrs. Clinton won support for her ideas about child care, while at the same time, convincingly refuting the other charges against her. However, her role as controversy-creator was perpetuated as well; in her book, one of the things Mrs. Clinton called for was difficult obstacles for couples wishing to divorce. Her role in the White House, whether positive or negative, would undoubtedly play a large part in President Clinton's reelection campaign.

Pope visits

Pope John Paul II came to the United States in November, leading mass in New York and other cities, and concluding with several large-scale events in nearby Baltimore. The visit was actually a year late — the Pope was scheduled to come to the U.S. in 1994, but he was delayed due to hip-replacement surgery and ill health.

Ongoing rifts between the Catholic Church in America and the Vatican on such issues as birth control, marriage for priests, and divorce didn't diminish the Pope's appeal. Hundreds of thousands jammed parade routes and attended the Papal Mass held in Oriole Park at Camden Yards. Following the mass was a well-attended parade, as the religious leader traveled down city streets in the famed "Pope-mobile."

Remembering A Warrior

WHEN ISRAELI PRIME MINISTER Yitzhak Rabin's assassination was announced, the reaction near and far was one of disbelief. His being gunned down as he left a rally for peace, the first political assassination of a high Israeli official, was not as hard to understand as the news that the alleged assassin was Jewish.

On the night of November 4, 1995 over 100,000 people, the largest crowd in memory, had gathered in the Kings of Israel Square for a rally in support of the Arab-Israeli peace agreement. Rabin appeared at the lighthearted festivities along with Foreign Minister Shimon Peres. As Rabin walked to his limousine, 25 year-old Yigab Amir rushed up to him, catching his bodyguards by surprise, and fired three shots, two of which struck Rabin. The last words Rabin uttered as he was whisked away to the hospital were "I hurt, but not terribly." He died in surgery about 90 minutes later.

A law student from Tel Aviv, Amir was not the kind of person that Shin Bet, the Israeli internal security agency, expected to try and kill Rabin. Although they had received warnings, they were more worried about Arab plots than Jewish ones. In a court hearing Amir claimed to be acting in the name of God and said "the murder was my obligation according to halackha" (religious law). Police immediately began investigating the possibility of a conspiracy involving right-wing extremist groups that were opposed to Rabin despite Amir's insistence that he worked alone. Amir was subsequently convicted of murder and sentenced to life in prison.

A general and former ambassador to the United States, Rabin came to power in 1992. On his first day in office, he announced his intentions to make peace with Arabs. "We must join the international movement toward peace, reconciliation, and cooperation that is spreading over the entire globe these days," he said. He

received the 1994 Noble Peace Prize (along with PLO leader Yassar Arafat) for his efforts to that end. In a statement delivered right after his death, President Bill Clinton hailed Rabin as "a warrior for his nation's freedom and now a martyr for his nation's peace."

Nearly three-quarters of the Israeli people supported the peace agreement. The vocal minority that opposed it included right-wing conservatives who saw the agreement as dismantling the dream of a greater Israel since the agreements included returning the territory gained in the 1967 Arab-Israeli War. Rabin had been denounced as a traitor by such groups and just two weeks prior to his death was depicted as a member of the Nazi SS. His death raised concerns about whether the implementation of the agreement would change since Israel was now without its most competent leader. Acting Prime Minister Shimon Peres announced that he was committed to continuing the implementation timetable that already existed.

In the court of public opinion, Peres and the peace process didn't fare very well. The May elections were a victory for right-wing nationalists, led by Benjamin Netanyahu, who were less enthusiastic about the peace process.

Locally, students gathered in a candlelight vigil to remember the the fallen Israeli Prime Minister, Yitzhak Rabin.

A memorial service was held in Lisner Auditorium where Prime Minister Rabin was remembered in word and song. Defense Secretary William Perry (left) was among the speakers who memorialized Rabin. Famed violinist Itzhak Perlman (above) played a musical tribute.

Against All Odds

The Cleveland Indians and the Atlanta Braves squared off in the first World Series in two years. The Braves won in six games.

For months, baseball fans were talking about The Streak. With each game he played, Baltimore Orioles shortstop Cal Ripken, Jr. drew one game closer to breaking one of baseball's "unbreakable records."

In 1939, Yankee first baseman Lou Gehrig retired after having appeared in 2,130 consecutive games, an accomplishment that surely would never be equalled. In 1995, Ripken not only equalled it, he surpassed it! On September 6, 1995, Ripken took the field, as he had done in every Orioles game since May 30, 1982, to play against the California Angels. This was consecutive game 2,131 -- but not until the fifth inning, when baseball games become official.

When the fifth inning came, fireworks exploded and cameras flashed, as 10-foot banners bearing "2-1-3-1" were unfurled in the outfield stands of Baltimore's Camden Yards.

The fans stood and cheered for Ripken, who emerged from the dugout and gave his jersey to his wife and two children. The ovation and celebration lasted 22 minutes that inning. Be fitting a hero, Ripken hit a home run in the game won by the Orioles 4-2.

It seemed as though Hootie and the Blowfish were playing every time you turned on the radio. The four-man rock group that seemed to come out of nowhere and dominate the audio scene did not go unnoticed on the video scene. Hootie, featuring vocals by lead singer Darius Rucker, won an MTV award for best new artist for their video, "Hold My Hand."

MEDIEVAL DAY

The blokes and wenches of the Program Board sponsored the third annual Medieval Day on Saturday, October 28. The day was jam packed with traditions of old, including a royal procession featuring the King and Queen of England, as well as a wide array of other talents.

Entertainment was scattered throughout the Gelman Yard and the Rose Garden. Highlights of the scheduled entertainment included a display of sword fighting, a fire-eater, and a troupe of child acrobats.

"The sword fighting was quite enjoyable to watch because I got a glimpse of how violent past generations have been, when duels were routinely and openly held on a daily basis," said Tolga Gulmen, a freshman who stopped by the festivities for some pumpkin painting and era-specific foods. "I sure wouldn't call those things pies, though. They tasted more like sawdust." Despite the quality of the food, he and others genuinely enjoyed themselves, as they truly got a taste of what medieval life was all about.

One of the individuals who was on hand to entertain would only name himself Croaker the Storyteller. His act not only included stories, but also magic tricks and a bit of juggling. Festivals such as this one are Croaker's life; he has been working at the Maryland Renaissance Festival for over nine years, and has just recently taken his act on the road to

other venues. Why does he do it? "I am an exhibitionist," Croaker explains.

Other traveling artists included numerous harpists and a cardinal. Also in attendance were several craftsmen, including Kirk McLaren. McLaren makes jewelry and charms out of Tarot art and Celtic Knot works. Although most people were under his tent to avoid the rain, many were interested in his wares. "This is a dying art. The handcrafting of metals is almost extinct in this country," said McLaren, a resident of Virginia who has been a sculptor for over thirteen years.

Adding to the ambiance of the day were a pack of GW student volunteers who acted as servants to the Royal Court, in costume and with accent. Lindsay Metzger was, for at least a few hours, a lower-class English peasant. More specifically, her exact title was Pickle Wench. "I was really getting into my character for a while. I felt just like a peasant, only with better hygiene."

Performers' Chair Julie Chernov summed up, "It was a really good event, and I wished more people had come to it. But despite the bad weather, everyone who participated had a really good time."

Topping the event off was a presentation on dynamic women in history as well as a performance by GW's own Recess, which ensured a fantastic ending to a phenomenal day.

Lucia Navarro-Walsh and Julie Chernov dress up in medieval costumes and enjoy the days festivities.

Iddo Porat prepares to fight in the fencing tournament as a little girl watches.

Lindsay Metzker dresses as a lower-class English peasant doing chores for the day.

Scott Marcus and Julie Newman pose in their medieval dress for the camera.

Recess performers Hilary Winston and Ptolemy Slocum act out scenes from the medieval times.

"IF OUR COUNTRY WISHES TO COMPETE WITH OTHERS LET IT NOT BE IN THE SUPPORT OF ARMAMENTS BUT IN THE MAKING OF A BEAUTIFUL CAPITAL CITY. LET IT EXPRESS THE SOUL OF AMERICA. WHENEVER AN AMERICAN IS AT THE SEAT OF HIS GOVERNMENT, HOWEVER TRAVELED OR

CULTURED A PERSON HE MAY BE, HE OUGHT TO FIND A CITY OF STATELY PROPORTION, SYMMETRICALLY LAID OUT AND ADORNED WITH THE BEST THAT THERE IS IN ARCHITECTURE, WHICH WOULD AROUSE HIS IMAGINATION AND STIR HIS PATRIOTIC PRIDE." -PRESIDENT CALVIN COOLIDGE

A City of Monuments and Memorials (left-right) Cast from metal taken from his flagship "Hartford," the statue of **Admiral David Farragut** in Farragut Square is a tribute to the first Admiral in the U.S. Navy. Guarded 24 hours-a-day, the **Tomb of the Unknowns** at Arlington National Cemetery contains the remains of an unknown soldier from each war United States was involved in during the 20th century. **General William Tecumseh Sherman**, one of the great Northern generals of the Civil War, was most noted for his march through Georgia. He commanded the Army of Tennessee and succeeded Grant as Commander of the U.S. Army. Modeled after the famous photograph by Joe Rosenthal depicting the flag raising on Mt. Suribachi, the **Marine Corps War Memorial** honors all Marines who have died for their country. The latest addition to the long list of memorials on The Mall was the **Korean War Memorial**, dedicated in 1995. It portrays a patrol of larger than life soldiers walking through a field. The equestrian statue of **President Andrew Jackson** was cast from a bronze cannon captured at Pensacola during his last campaign against the Spanish in 1818. It became the first equestrian statue in Washington when it was dedicated in 1853.

The Supreme Court was the only branch of government to work through the Blizzard of '96 that brought Washington and the Northeast to a halt amidst snowdrifts.

As anyone who had ever been on a campus tour knew, the Library of Congress was available when students couldn't locate the information they needed in Gelman Library or the other Consortium libraries. The historic Thomas Jefferson building, houses the main reading room of the world's largest Library, which made for a nice place to study even if all the books one needed couldn't be located.

Tale of Two Cities

Going to school in Foggy Bottom, it was easy to forget about the other parts of the city of Washington. Beyond the ivory columns and well-manicured landscaping of "official" Washington, there was a city which bore little resemblance to its neighbor. Instead of walking down the street and looking into storefronts, one saw boarded up and cinderblocked windows to keep out vagrants. Unlike in the nicer parts of Northwest, it took the police hours to respond to ordinary calls leading some residents to resort to exaggeration to get the police to show up quickly. While no longer the murder capital of the country, homicides and crime were still a serious problem that made many students shun venturing into whole parts of the city.

GREEK WEEK

LET THE GAMES BEGIN

Instead of holding Greek week when it is traditionally held in the spring, Panhel and IFC decided to move it up so that it took place in the early fall. Greek Week served as both a fall welcome and as a promotional vehicle to increase campus awareness of fraternities and sororities prior to rush. Greek organizations kicked off the week with a night at DC's Evening at the Improv. Other week long activities included a softball game, a

flea market, a barbecue on the quad, a trivia contest, and other events on the quad.

Philanthropy was also a key concern. Greek members sponsored a clothing drive for the homeless where more than 1700 articles of clothing were collected. Additionally, many participated in the blood drive and more than 150 pints of blood were donated. Greek Week was a great beginning to a new school year.

Newt Gingrich was eventually forced to give in after public support for his hardline agenda evaporated amidst the uproar over the partial shutdown of the federal government.

Grinding to a halt

A BATTLE OF WILLS ERUPTED in the debate over the federal budget bringing the federal government to a halt twice in late 1995. The shutdown did not come unexpected. In July, White House Chief of Staff Leon Panetta warned that the president and Congressional GOP leaders were on a "collision course" over 1996 spending bills that could lead to a shutdown of the federal government.

At the heart of the debate were differences in ideology and the role of government. Congressional leaders, keeping with their approach of handing more power to the states, wanted to restructure the federal bureaucracy, eliminating departments and making changes in federal programs. Education and Commerce were two departments targeted for elimination and reform of environmental and welfare programs were also high on the agenda.

Republicans on the Hill tried to use the budget as leverage to force

the president to accept these and other reforms to the federal bureaucracy. The tactic was denounced by administration officials as an attempt to hold America hostage to the desires of Congressional elites. While they shared a common ground in desiring a balanced budget, Clinton was against deep cuts in social programs, especially Medicare and Medicaid.

October 1st came and past without a budget agreement in sight but the government continued to operate on a continuing resolution that extended funding until mid-November. With Congress and the Clinton administration unable to reach agreement on temporary spending bills that would have kept the government running, 800,000 of the 2.1 million federal employees nationwide, including 150,000 in the Washington area, were furloughed on November 14. Agreeing to seek a program to balance the budget in seven years, Clinton approved

spending measures that ended the week-long shutdown. Three weeks later, 280,000 workers were again told to stay home because talks intended to avoid a second shutdown broke down when Republicans walked away from negotiations.

A third shutdown was averted in late January when Clinton signed legislation that would have kept the government running until May. This legislation was passed after House Speaker Newt Gingrich promised not to try to shut the government down for a third time and the House leadership

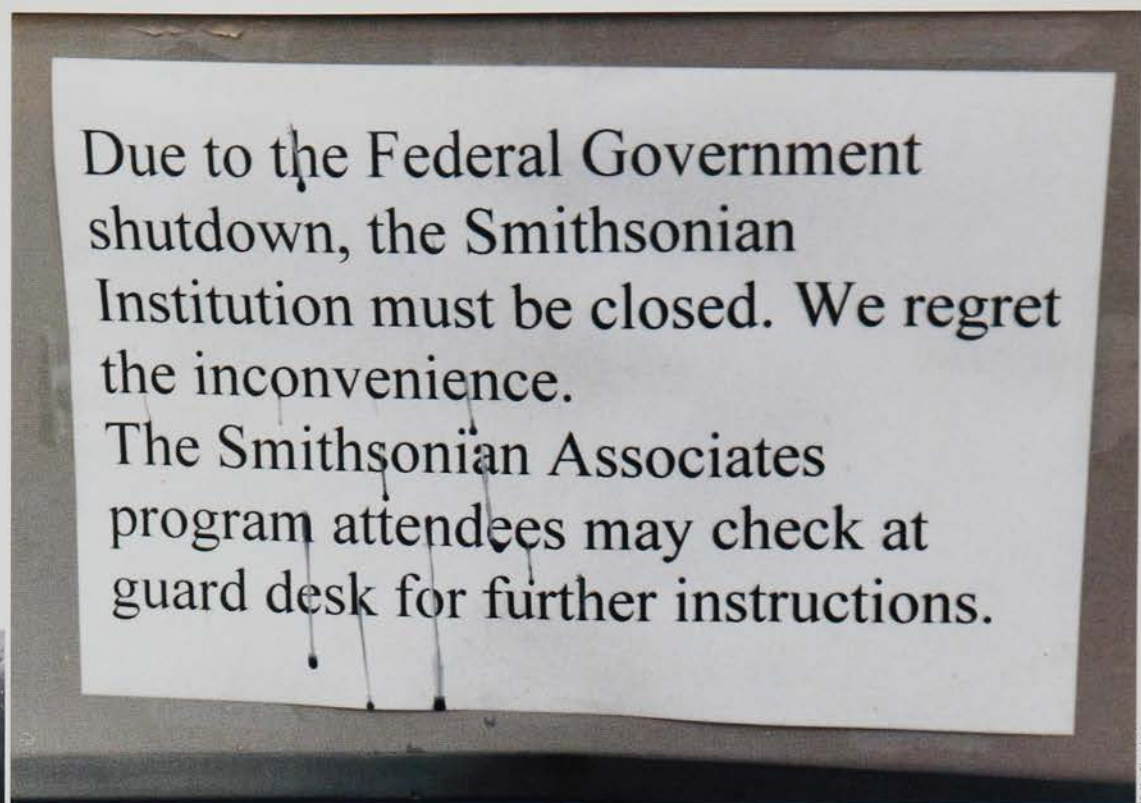

For most students it was business as usual except for the handful that had jobs in a government agency that was shut down. Tourists were distraught at going around the city only to find the Smithsonian museums and other attractions closed. For a brief moment some thought the shutdown wouldn't be that bad when city announced that parking attendants would be among the 13,000 District government workers furloughed. The night before the furloughs took effect, however, the gov-

ernment recalled all of the attendants who each average \$1,400 in tickets every day.

Seven months after the start of the fiscal year, the federal government became fully funded in late April when a \$163 billion agreement was passed and signed. The bill kept

all departments, leading to a sigh of relief at agencies that were threatened with closure and many job openings created by the departure of workers who took other jobs out of fear that their jobs were in danger. The President was forced to accept \$23 billion in cuts to discretionary

spending as well as endorsing the goal of reaching a balanced budget within seven years.

The true magnitude of the political backlash resulting from the shutdown would have to wait until November 1996 to be measured. Most Americans saw the Republican

Congress as the prime culprit for the two shutdowns blaming their unwillingness to compromise and their poll figures fell accordingly. "When the leadership of Congress insists on going it alone, one party alone, we get gridlock, stalemate, vetoes, government shutdowns," said Clinton.

MARTHA'S MONUMENTAL MASQUERADE

Without a doubt, Martha's Marathon of Birthday Bargains was a smashing success. In the event's 30 year history, Martha's has raised \$246,000 towards housing scholarships, and 1996 brought in a record \$21,000.

The audience was amazed by the top bid of \$2,200 for First Pick for the Kennedy Onassis in-hall lottery. Junior, Valerie Purdy purchased First Pick Francis Scott Key for the second year in a row. She paid \$1,250 once again.

The Residence Hall Association received donations from United States Congressmen, local hotels, and on-campus organizations. The planning process began back in early September and there were more than 75 items auctioned off by professional auctioneer Tom Weschler. Tom donated two hours of his time to make Martha's 30th birthday a night to remember.

No Experience Required

One of the strongest selling points of The George Washington University was its location: right in the thick of the nation's capital. GW's urban campus allowed it to offer a variety of internships. Students could get job experience, build up their resume, and expand their learning outside the classroom.

Some internships offer pay or even the ability to get credit hours. One junior in the business school explained, "Last semester, my schedule was perfect. Then one of my classes was canceled. Luckily, I was able to put together a three credit internship that filled the hole in my schedule." Most students were so happy to secure internships that some did not care whether it was paid. The practical work experience helped the students both in and out of the classroom.

Internships were offered all over D.C., but one of the best was at the White House. Mark Hazen, a freshman, was one of the many interns at The White House who printed Christmas cards for President Bill Clinton and First Lady Hillary Rodham Clinton.

While a good number of GW students intern on Capitol Hill, there were also internships that were not

in the government sector. Finding out about possible internships was quite easy. Students who are interested can check out The Career Center, the Internet's job and internship listings on line, specific departments at GW, or the grapevine.

The main point of an internship was to gain invaluable experience and help make an impressive addition to a resume. Those who were familiar with interning, offered this tidbit of advice to the neophytes about to embark on their first internships: "If an internship happens to be unpaid, you can be more demanding about exactly what you want to do. Don't settle for answering phones if you crave other kinds of experiences. Since you are donating your time gratis, you might as well let them know what you are interested in doing."

With employers and graduate schools paying close attention to work experience in addition to grades, students treated internships as a way to get a foot in the door. They also hoped it would open up more opportunities for them and/or that the internships would lead to full time jobs and promising future careers once they graduated.

Dave Letterman continued to hold a solid lead among college viewers with his top-ten lists and out-of-control style. In the war for ratings, however, "The Tonight Show" with Jay Leno bested Letterman's "Late Show."

Fascination with the paranormal and supernatural made "The X-Files" a Friday night cult phenomenon. The show was about an unconventional FBI agent named Fox Mulder (David Duchovny), who developed a consuming passion for a group of unsolved cases known within the FBI as X-Files. To keep tabs on his work — and to debunk his theories — the FBI teamed him with Agent Dana Scully (Gillian Anderson), a young, skeptical agent who has a degree in medicine and allegiance to science. The unlikely duo investigated bizarre deaths, disappearances, and other uncommon events with the common link between the plots being the inability to explain the events through science.

Agents Mulder and Scully investigate the murder of a lonely, overweight woman whose death is linked by Mulder to disappearances of women looking for love on the Internet. Despite the local detective's objections to Scully on the team, her analysis reveals strange discrepancies in the victims weight and body composition: somehow the killer removed all the fat from the corpse. But how do Mulder and Scully catch a murderer whose M.O. resembles that of a scorpion than a human being? The investigative team itself becomes the target of a killer with monstrous appetites as the agents track a bizarre stalker.

Combining the extraordinary talents of best-selling author Michael Crichton and Steven Spielberg's Amblin Television, "ER" explored the inner workings of an urban teaching hospital and the dedicated physicians who staff its overburdened emergency room. Starring Anthony Edwards, Julianna Margulies, Eriq La Salle, George Clooney, Sherry Stringfield, Noah Wyle and Gloria Reuben, "ER" was the highest rated show on TV and the show to watch on Thursday nights.

<i>Maher Jafari</i>		Karin Weinberg
<i>Ruth Jimenez</i>		

Satisfying the Munchies

ARAMARK Dining Services once again provided GW students with meal plans for their academic year. In question, however, was the food's quality and price. Freshman and sophomores were required to be on the meal plan, and not everyone was happy.

The food was relatively expensive but in competition with other local food services. The food was served fresh and hot and although there may have been questions concerning the food, J Street had no problem filling to its capacity during lunch and dinner every single day. Cashier Debra Banks disagreed with the notion that GW students were as a whole dissatisfied: "I think they've really liked it, especially the deli. They always come, running into line."

Other issues of contention were the variety of foods being offered, and J Street's new, shorter hours. In particular was the decision to discontinue 24 hour service at J Street's Diner. "I really liked being able to come back to J Street after a long

night out — now, there's not a place in sight to get some fries at four o'clock in the morning," commented freshman Kristin Jenkins, who was just one of the Diner's hundreds of late-night customers. Dining Services administration members defended the action as a cost-cutting measure which eliminated the waste of an unused service. However, the massive wave of protest by the Student Association and GW as a whole led Dining Services to reinstate longer hours in certain areas.

Besides J Street, of course, was the all-you-can-eat Thurston Dining Room. Students held Thurston as their favorite for its locale — being right downstairs, the stuff-yourself-and-go appeal of Thurston's basement was overpowering. Another regular genre of Thurston eaters was the basketball team, who frequently came in to fill up before a big game. This was also an exciting benefit to the rest of GW, who got to celebrity sight-see while they ate.

The last piece of big news was the end of the Mitchell Courtyard Cafe. As students began to loudly decry the new 18% surcharge imposed by Domino's, Aramark converted the Mitchell facility into a branch of its own pizza service, Itza Pizza. While most contended that Itza Pizza was not nearly as tasty as its off-campus competition, many still ordered it because it was cheaper.

Combined with off-campus dining alternatives, GW was still more flexible than most other universities, leaving many students well served.

Going Out

When the partying began, on a Thursday, Friday or any other night here at GW, the city provided GW students with a lot of options. The city, filled with bars, clubs, and The Mall, was very relaxed compared to other major cities in the United States. While most people enjoyed going out, nightlife for others meant staying home and relaxing. Certain people stick to the same thing all the time which meant going to the same bar week after week. People who did this like the familiarity of the environment. They liked meeting the same people and liked to listen to the same disc jockey attempt to mix songs together. They drank the weekly special and attempted to consume as many beers as possible. Notably, the latter was a common theme among the students at GW. Most people's stories by the time they are seniors all began with a familiar phrase - "the best time was when I was really wasted and..."

Clubs in DC provide different mediums for students to get out and to party. The main attraction was supposedly the music, but the alcohol played a vital role as well. The music was relatively similar at most of the clubs, however, some switched the music variations on different nights in order to provide a change of pace, or to attract a different crowd. The clubs usually charged a cover fee of around \$10. Once you entered the club, the DJ's familiar style of music began to fill your head, and depending on the aura of the party and your mood as well, an overwhelming desire to have a good time engulfed your body. Drinks ranged from \$2 - \$25. Most clubs had a VIP area where those that have bought a membership to the club had special access to.

The Zei Club, and Babylon were two of the many popular clubs located only a couple blocks from campus. Both were popular spots for the older students where the minimum age was usually 21. The required dress was casual, but no sneakers or hats were allowed. This was rarely even a problem, as most of the people that attended clubs in DC did their best to look their best. The Spy Club and Bravo! Bravo! were very popular among the underclassmen here at GW, where the minimum age requirement was 18.

Going Out

Specialty clubs, such as Buzz at the Capital Ballroom, every Friday would provide a huge dance area catered to rave/trance style music. These weekly events started at ten at night and would end somewhere between six or eight the following morning. This type of club has become increasingly popular, and Buzz, which has been on and off over the last couple years, is DC's first party dedicated to this rave/trance style of music.

Let's not forget about the bars. They have always held a vital role in the life of college students. GW bars, such as Flipp's, have been a part of the school's party scene for nearly ten years now. People could go there every weekend for their entire college career and not get sick of it. The atmosphere was very laid back, the music was good, and everybody just wanted to drink. Other bars like the Black Rooster, Crow Bar, and Flick's provided similar surroundings. Promoters usually from GW or a surrounding school, set up the entertainment at these bars. The cover charge was usually \$5 and varies if you were of drinking age or not. The promoter provided the people, but then retention was up to the bar itself. People came back week after week if the bar gave them the fulfillment that they needed.

CELEBRATING

Students, faculty, and staff filled Lisner Auditorium to mark GW's 175th Anniversary Convocation. Chairman of the Board of Trustees, Jack Zeglis discussed the vision for the future of the University and lamented on the past 175 years of memories. President Stephen Joel Trachtenberg joined in the celebration and honorary degrees were presented to talk show host Larry King, former tennis great Martina Navratilova, and former GW Board of Trustees Chairman Everett H. Bellows.

Larry King, no stranger to politics, has served as a voice of the people and interviewed prominent members from around the globe. Martina Navratilova, was commended for her commitment to animal rights, environmental protection, and issues dealing with her homosexuality. Everett Bellows was recognized for his work on the Board of Trustees and his devotion to GW.

HOMECOMING CELEBRATION

GW's Homecoming Week and Charter Day Celebration, focusing on the 17th Anniversary was unbelievably successful. Starting on Monday, February 5, the activities lasted thru Saturday the 9th. The first of three home basketball games was held on Monday night, where the men played UNC-Charlotte. Entertained by a skillful win, students in attendance were given free Homecoming Week megaphones, compliments of the Program Board.

On Tuesday night, hypnotist Tom Deluca stunned a packed Lisner Auditorium, as he had entranced students dancing, putting on other people's shoes, and talking to their hands. This was also the first opportunity to get the 3-D Homecoming t-shirt, complete with glasses.

On Thursday night, students packed the Marvin Center for MC 175: We've Got It All. The Program Board put on two showings of "Get Shorty" in the Betts Theatre, while other diversions entertained others on the Marvin Center's five floors. Upon entrance, everyone received an MC 175 t-shirt and cup, as well as party hats and other favors. Then it was on to Columbian Square where everyone became a contestant in a game-show for cash prizes. The free food was matched on the second floor where everyone was treated to buff and blue 175th Anniversary cupcakes. In the third floor ballroom, a carnival atmosphere took over. Students played in the Velcro Olympics, while others made their own karaoke music videos, complete with costumes. Others had their photos placed on their favorite magazine covers. Students were treated to free billiards and bowling on the fifth floor, where tenpin tourneys

Gala Celebration

A crowd of over 2,000 partied the night away at the University's most dressed-up celebration of its 175th Anniversary. Guests were initially greeted by a hulking banner which hung from the archways of historic Union Station. Inside, an endless feast of gourmet foods, topped with the spectacular and invigorating music of Odyssey, facilitated an ecstatic celebration of longevity.

The evening was speckled with exciting surprises, including appearances by George, as well as the giveaway of sparkling light wands. By far, the most impressive feature of the evening was the 3-D laser show

which showcased GW and its history. Attendees donned special 3-D glasses and marveled at the screen, as images of the clocks outside Gelman and Quigley's came speeding toward them. Topped with fog, the laser show left everyone in euphoric awe. The show was repeated throughout the evening, and it was accompanied by laser interpretations of many dance favorites.

Guests ranged from trustees and elders to undergraduate students, and the cuisine was as varied as the crowd. From Chinese food to a genuine bell-ringing ice cream cart, no one left the party hungry. Although the event was scheduled to end at midnight, exuberant gala-goers danced well past that time.

The Smith Center

The Smith Center served many functions for the students, faculty, and staff of the university. Many students would use the weightroom for weight training and aerobic exercise after new hours of operation became established and new equipment was purchased for general use. Students played raquetball or squash on their free time, and many participated in many of the intramural sports offered by the Smith Center.

Fu-Sheng Wu

Curt Bergstrom

Fu-Sheng Wu

When the Marvin Center opened in February 1970, Mrs. Dorothy Betts Marvin had not yet donated the \$1.5 million that she paid to name the center after her late husband, GW President Cloyd Heck Marvin and the theater after herself. The day after 5 students were killed by national guardsmen at Kent State University on May 4, 1970, students gathered at the Marvin Center to christen it the Kent State Memorial Center. 1000 students were present at the ceremony which marked the beginning of a student strike that canceled classes for the first time since the Civil War

and resulted in the faculty declaring that finals exams would be optional.

The student strike was part of a national student strike called for by protestors of the trial of Black Panther Chairman Bobby Seale, in New Haven, Connecticut. Students picketed classes, urged professors to cancel classes, and set off fire alarms to disrupted classes. The extent of the strike was disputed. The Hatchet reported that class attendance was below 30% while the official GW press release said the 100 roving strikers picketed classes but caused little disruption.

Curt Bergstrom

As the center of campus life, 20,000 people passed through the Marvin Center each day. It was home to student organizations, a game-room, the campus bookstore, a convenience store and J Street.

Fu Sheng Wu

Fu Sheng Wu

GW students spent their four years studying hard and hoping to do well for one main reason, that they would be able to snag their perfect job or any job upon graduation. While the mountains of debt that many accumulated while in school might influence students to take any job that came along, most were looking for promising careers as well. Twice a year, students had the opportunity to seek out job and career opportunities at the Career Fair sponsored by the Career Center.

One never exactly knew how experiences from internships, student organizations, and classes might give them an edge in the interview. While other avenues for locating jobs such as the classified ads and networking were always available, the career fair brought prospective employees and employers together in a single place. Students who attended the fairs dressed to impress potential employers with resumes in hand.

Many knew that there are numerous jobs and careers available

but it take both skill and luck to match their knowledge, talent, and abilities to a profession. The ideal jobs were out there, but finding them was the problem. The career fair gave students the opportunity to speak with company representatives and learn about the individual firms but only its usefulness was limited to the number of firms that came to the fair.

Career fairs over the years had an unpredictable track record in terms of finding qualified employees. One reason for this was that there were fewer positions than employees, a common problem in recent years. Other reasons were job locations in areas that students didn't want to settle in, and compensation packages that weren't enough.

Some students might have thought that they knew the exact job they wanted and the firms they wanted to work for, but many students at the Career Fair stumbled upon other jobs that were equally if not more appealing.

Going Out In Style

On Saturday, May 18, GW enjoyed its last big party of the year before Commencement. The Monumental Celebration was held once again at Union Station and drew a vibrant crowd. Guests included graduates and their families, as well as others from the GW community at-large. The Class of '96 celebrants were entertained by a live band as well as a new 3-D laser show highlighting GW and its programs. Other attractions at the Celebration contributed to the family atmosphere and included Smith Center employees wearing giant animal costumes, magicians, palm readers, and a caricature artist. The festive graduates' appetites were satiated by an extensive selection of delicious gourmet desserts.

The Monumental Celebration was also tied into the theme of

GW's 175th Anniversary year, as advertised by the sprawling banner that hung from the main entrance of Union Station. Young and old alike danced themselves into the night, as the graduating seniors congratulated each other, and GW congratulated itself, for the last time before Sunday's ceremony on the Ellipse.

Congressman Stearns became a member of the US Congress in 1988, representing the Sixth Congressional District of Florida. After serving as a Captain in the USAF, Congressman Stearns worked with Control Data Systems, Inc., and founded Stearns House, Inc., in 1972. He has served on the Banking, Finance, and Urban Affairs committees. He currently serves on the Telecommunications and Finance; Health and Environment; and Energy and Power subcommittees. Congressman Stearns has received numerous awards for his work in Congress including the Outstanding Leadership Award.

about the award

In 1937, the General Alumni Association created the Distinguished Alumni Achievement Award to recognize individuals who distinguished themselves through notable achievements in their professional and personal lives. Through their leadership, loyal support, service, and dedication, they have perpetuated the great name of The George Washington University. On May 18, 1996, in historic Union Station, The George Washington University honored seven individuals who brought credit to themselves and their families, to their community, and to their alma mater. A permanent recognition wall, located at the Academic Center, displays the photographs of current honorees and proudly lists all past recipients of this most prestigious award.

Ms. Brown was Chairman of the US Consumer Product Safety Commission. She has served as a consumer advocate for two decades, directing product studies and surveys including the nationally recognized "Toy and Childrens' Products Quality Safety and Price Survey." Ms. Brown was active in the formation of the Washington Office of Consumer Protection and served from 1980 until the time of her current appointment as vice president of the Consumer Federation of America. She appears regularly on national television and writes a safety column in *Good Housekeeping* magazine.

SENIOR CELEBRATION

One of the new events added to commencement weekend were the Celebrations of Student Achievement sponsored by each school for its graduates. Designed to be more personal than the unified commencement ceremony, each graduate's name was called and they received a diploma case. Student awards, which had previously been presented at sparsely attended awards ceremonies were also presented.

Umbrellas At The Ready

The question that was on everyone's mind for this year's 175th graduation was if there would be rain. Memories of last year's fiasco was fresh on people's minds. Part of the section was reserved for the 1995 graduate who were invited back to attend the ceremony.

On May 19th, graduates and their proud friends and parents actually were greeted with very warm weather early in the morning. As the commencement progressed, the temperature just got warmer and warmer, until it became downright hot and humid.

The commencement planning committee had ordered over 25,000 cases of bottled water thinking that it would be more than sufficient. Even before halfway into the ceremony all of the water stations were completely out of water. The sun's rays were so harsh that people started to move their chairs out of the Ellipse and onto the surrounding sidewalks. The commencement ushers began to patrol the entire area to make sure that people and especially little kids were out of the streets. As a result of the heat and humidity one 12 year old boy fainted from dehydration as well as a pregnant woman. Both were fine once the paramedics in the emergency tent took care of them.

People were desperately waiting for the ceremony to end and were really glad that the ceremony was abbreviated. The question that was on everyone's mind was whether it was cut short due to the Powers That Be or because the audience and graduates were growing restless and sunburned in the open field. One person commented that she felt that the graduation programs were really tacky and wondered why they could not keep the style they had previous years. "It was not as classy as it could have been for the 175th," said one attendee. In addition to the blue striped and red poka dotted com-

mencement program, ushers were also handing out little hand flags emblazoned with the 175th logo.

On top of this some people thought that the ceremony could have been more elaborate considering it was the 175th. During the commencement of 1994, they had a food tent after the commencement and tents for graduates to meet the dean's of their college. During the rained out commencement of 1995 they had barrels of apples and nuts which never got eaten. This year they eliminated the dean's tents and foods. President Bill Clinton was invited to speak but was unable to attend. Instead of one keynote speaker, there were five.

When it came time to confer the degrees, it appeared that those who were receiving Bachelor's of Business Administration from The School of Business and Public Management were the most enthusiastic by the explosive cheers that they gave off. Underneath the graduation gowns, graduates sneaked in bottles of wine and champagne. Others were busy hugging their friends and posing together for one last picture before they started their lives as post graduates.

Most kept their speeches under five minutes with a few who only gave two sentences of good luck. President Stephen Joel Trachtenberg asked the audience if they wanted to hear his prepared speech of approximately half an hour in length. People were not very enthusiastic so by democratic consensus, President Trachtenberg gave a three minute speech wishing the graduates well in the future and the still uncharted history of each graduate.

In the end while the weather may have been free of rain the umbrellas still came out anyway to ward off the solar rays. The lesson, you cannot win either way against Mother Nature and her moods.

Francis S. Collins, a physician-geneticist and director of the National Center for Human Genome Research, oversaw the 15 year project to map and sequence all of the human DNA by the year 2005.

Marian Wright Edelman, founder and president of the Children's Defense Fund, is a life-long advocate for disadvantaged Americans.

Roy Lichtenstein is noted as one of American Pop Art's originators.

Hugh B. Price is an advocate for urban and minority issues, particularly those involving African Americans.

Yitzhak Rabin's son, Yuval, receives GW's first posthumous degree for his father's dedication towards Middle East peace talks.

Chief Justice William H. Rehnquist has served on the highest court for 24 years.

Classes are held for the first time on September 8

1822

The Theology Department is discontinued due to lack of interest. Its presence was related to the school's Baptist roots.

1825

The Medical Department is founded at the site currently occupied by the Hard Rock Cafe on E Street.

1825

A second attempt to establish a Law school is made. This effort turns out to be more successful than the first attempt in 1826.

1865

The School of Engineering's predecessor, the Corcoran Scientific School, is founded.

1884

The School of Government, later to become the School of Business and School of International affairs is founded.

1898

The requirement that all students take Latin is eliminated.

1908

Physical education is eliminated as a graduation requirement.

1966

The Medical School moves into Ross Hall and for the first time in GW's history, all programs are located on the same campus.

1973

The School of International Affairs is renamed in honor of GW's 14th president, Lloyd H. Elliott, who played a large part in its development.

1988

Elliott School of International Affairs

GW began offering programs in international affairs before the turn of the century. The School of Comparative Jurisprudence and Diplomacy, founded in 1898, sought to meet the needs of those pursuing careers in government and the foreign service.

Since then, international affairs were always a part of the program even as the administrative structures underwent a number of metamorphoses prior to the international affairs programs becoming a part of the Elliott School of International Affairs.

The Jurisprudence School was replaced in 1905 with the School of Politics and Diplomacy. Two years later it became the College of the Political Sciences and for the first time, it offered international programs to undergraduates. In the reorganization that followed one of the University's worst financial crises, the programs were transferred to the Columbian College in 1913. The year following his arrival as GW's twelfth president, Cloyd Heck Marvin created the School of Government. Its degree programs sought to integrate the study of international politics with international business. By the mid-1950s the school hardly reflected its name with the great majority of degrees being conferred in the areas of business and accounting. The international affairs faculty gained greater recognition in 1960 when the school was renamed the School of Government, Business, and International Affairs.

Recommendations from accrediting bodies, committees, and the faculty for the separation of the business and international affairs programs into separate schools were finally acted upon in 1966. In one of his first official acts, President Lloyd H. Elliott created the School of Public and International Affairs which was renamed in Lloyd Elliott's honor in 1988.

Since then, three deans have led the way in expanding the scope and depth of the schools programs: Burton Sapin (1969-1983), Maurice East (1985-1994), and Harry Harding (1995-present). Under Sapin, interdisciplinary programs in Russian Studies; Science, Technology, and Public Policy; Latin American Studies; Urban Affairs; and Security Policy Studies were added. Dean East helped to refine the programs and strengthen the faculty.

the Elliott School today

Dean Harding saw his principle challenge as consolidating the Elliott School's position as one of America's leading professional schools of international affairs. Towards that goal, his priorities were to enhance the faculty by recruiting first-rate scholars to the full-time faculty while also drawing

from the wealth of experience in the Washington area. An exchange program established with the National University of Singapore was hoped to be but the first in a number of such programs that would bring visiting professors from around the world. He also had plans on diversifying the graduate programs and to professionalize the curriculum. Working with employers, he was in the process of identifying the skills that are needed most for students to flourish in their careers and how to incorporate them into the curriculum. The last part of his four-part plan was to bring more students and faculty with international backgrounds to the school.

In other news, the Carnegie Corporation awarded the Elliott School a grant to study current peacekeeping operations in Bosnia and Haiti, among other, to examine ways that international organizations can prevent and ease violent conflict. The Elliott School was named the ninth Asia-Pacific Economic Cooperation Study Center in the United States. The Centers were created at the urging of President Clinton to promote the exchange of ideas and policy-related research concerning the Asia-Pacific region. The Elliott School was selected because of its exceptionally strong faculty in international economics, international business, and Asian studies.

Harry Harding, Dean

School of Engineering

"Engineering into the 21st Century" was the maxim coined by Dean Gideon Frieder as the theme for GW's School of Engineering and Applied Science in its press toward the year 2000. SEAS maintained its tradition of progress in technology with leading faculty, strong program of research and education, and an accomplished student body destined to impact the next century with their mastery of a new generation of technologies in a broad spectrum of industries.

The 1995-96 academic year was the 112th year of engineering education and research at SEAS. The school celebrated this auspicious year with exuberance, hosting the 1995 National Concrete Canoe Competition, cheering the success of the GW Solar Car Team, hosting the distinguished Welling Lecture and Frank Howard Lecture Series, sponsoring a successful Engineer's Week, and capping the year off with a SEAS Awards and Graduation Ceremony with more than 2,000 guests in attendance. The enthusiasm generated by these and many more activities throughout the year was a fitting tribute to the long and illustrious history of GW, and a celebration of SEAS part in that legacy.

For Dean Frieder, who this year presided over the graduation of an undergraduate class whose arrival at GW coincided with his own, the 1995-96 academic year was particularly momentous. On behalf of the school, Dean Frieder hosted a successful site visit by the Accreditation Board for Engineering and Technology, initiated the inaugural Welling Lecture and received Congressman Clifford Streamns and U.S. Nuclear Regulatory Commission Chairperson Shirley Jackson as speakers for the Frank Howard Distinguished Lecture Series.

Engineering student achievements during the year were also cause for celebration. So impressive was the achieve-

ment of the Solar Car Team, that the District of Columbia City Council declared September 22, 1995 a day in the team's honor. The concrete canoe team placed 21st nationally. Another notable student achievement of the 175th year was the revival of the MICHELECIV magazine, the journal of SEAS student and faculty research.

SEAS undergraduate enrollments showed a steady increase, with first-year classes exceeding 100 for the second straight year. The combined undergraduate enrollment as of the fall 1995 SEAS census was 553; 1837 master's degree candidates and 419 doctoral candidates comprised the graduate population. The Summer, Fall, and Spring graduating class for 1995-96 included approximately 90 undergraduates, 350 master's graduates, and 50 doctoral graduates.

With the close of GW's 175th Anniversary year, we applaud another graduating class who steps forward to employ their engineering expertise and modern technologies to the highest utility for the utility for the improvement of life into the 21st century and beyond.

School of Business & Public Management

T Seniors graduating in 1996 with Bachelor of Accountancy and Bachelor of Business Administration degrees witnessed an exciting period of change and progress during their four years at the School of Business and Public Management. Since their arrival on the Foggy Bottom campus, a developmental approach to education was carefully constructed to meet the needs of students and employers in the 21st century.

A strong community developed among the students, with this class pointing the way to increased excellence in SBPM Undergraduate Programs. As a result of these changes and the School's growing reputation, a 50% increase in applications occurred from 1993 to 1995, matched by a dramatic increase in SAT scores for entering students. The Class of 1996 was also the first to benefit from major curriculum revisions that have broadened the scope of their classroom work.

Under the leadership of Dean F. David Fowler and Associate Dean for Undergraduate Programs Lois Graff, business education was redefined to extend beyond the classroom walls, teaching students how to plan for the rest of their lives. This began in the freshman year with the First Year Development Program where students learned to identify their strengths and better define their goals. Mentoring was a key element of this program, with upperclass student mentors and individually matched business mentors helping to guide students through the first doors of the professional community.

The Mintz Sophomore Get-away helped students refine goals set in the freshman year. In 1996, this student-managed program received the endorsement and generous support of the Mintz family. Alumnus Arthur Mintz received his BBA in 1966, his wife Judith is also a GW alum, and this year his daughter, Allison, followed in her father's footsteps, graduating with her BBA.

The retreat format continued in the junior and senior years when students were invited to attend the School's Leadership Retreat. This event was also produced by the students themselves and was attended by all members of the SBPM community. This final phase of the students' developmental program served as a transitioning element to assist students as they prepare to move into the professional world following graduation.

F. David Fowler, Dean

Before Commencement 1996, students also participated in a number of other activities designed to supplement their classroom education. Many participated in internships and co-ops. B-Team, the SBPM student-run business, chose two areas in which to develop business plans—event planning and import/export. Sponsored by the School, a number of students attended national conferences. In addition to the Women in the Workplace events sponsored by the School as part of GW's 175th anniversary, students themselves organized a series of luncheons featuring women business professionals that increased both awareness and networking opportunities. Opportunity was also the key to such student-initiated programs as The Road Ahead and Junior Jump Start. In the latter, students, working with the Career Center, initiated the program to give themselves an advantage in the post-graduation job search.

As is tradition, School awards were announced at the final event of the year—the SBPM Senior Celebration. Following a lively processional and standing ovation from family and friends, students heard personal greetings to the SBPM Class of 1996 sent by President Bill Clinton and were presented SBPM class medals. Addressing his fellow graduates, Dustin Cornwell, SBPM Distinguished Scholar, illustrated the changes he had experienced at GW through his favorite song lyrics.

Shape the Future

Education is one of the most controversial topics discussed in America. The news informs the nation of the ever declining quality in education and of a future filled with dismay. As Dean of the Graduate School of Education and Human Development, Mary Futrell intends on shaping the future from the ground up.

Dean Futrell received her undergraduate degree in Business Education from Virginia State University (formerly known as Virginia State College). While teaching Business Education at the Parker-Gray and George Washington High Schools, she earned her master's degree in Secondary Education from the George Washington University. In 1992 she received her doctorate in Educational Policy Studies from the George Washington University.

Ranked in the top 20 percent of U.S. graduate schools of education by *U.S. News and World Report*, the Graduate School of Education and Human

Development, prepared leaders for the challenge of today. With three departments the GSEHD effectively trains educators: Leadership counseling, CHaOS—Counseling in Human and Organizational Studies, and Teacher Preparation and Special Education. Within these departments students develop skills that will enable them to shape the minds of the future.

"Education is constantly changing, especially in the next five to ten years." Dean Futrell recognizes the changes in education. Her work as former president of both the National Education Association and the World Confederation of Organizations of the Teaching Profession has allowed her to understand the demands of education at all levels. The demands that encompass the education profession are those of technological advancement in the classroom, multiculturalism and the ever present social problems. The GSEHD takes the challenges and effectively uses them to educate students. With classroom interaction, students receive hands on training of

what it is like to teach in a school system. They learn that teachers become leaders while interacting with schools, families, and communities. These skills the GSEHD try to produce and enhance in their students.

"We help prepare those who want to give back to society." When asked why she went into the teaching profession Dean Futrell responded, "To give back to society." The dedication and determination of Individuals like Dean Futrell and those enrolled in the GSEHD who dedicate themselves to taking on the challenges that face the American and global education systems and resolve them into positive forces. Inspirational and devout educators are needed to change the world and with Dean Futrell at the head of education development, success is around the corner.

Human Development**

Columbian School of Arts & Sciences

The Columbian School of Arts and Sciences was the cornerstone of GW, dating back to the school's founding as the Columbian College in 1821. Originally, Columbian College was divided into a Classical Department with Professors of General History, Belles Lettres, Rhetoric, Moral Philosophy, Learned Languages, Anatomy and Physiology, Chemistry, Mathematics, and Natural Philosophy; and a Theological Department which was discontinued after two years. In 1824, the Classical Department awarded its first three bachelor of arts degrees. Seven years later, the College conferred its first Master of Arts degree.

As Washington developed into an urban center after the Civil War, the Columbian College began offering evening classes for advanced students. The old Classical Department was placed under a "Collegiate Department" which offered seven fields of study. This department was renamed Columbian College in 1873 when the university became Columbian University. In 1888, the first women entered Columbian College but were restricted from attending class and had to meet privately with their professors. That same year, the College awarded its first Ph.D. degrees to two of its professors. This established the university as one of the first Ph.D. granting institutions in the United States.

In its first reorganization since the university became George Washington University in 1904, a Junior College responsible for teaching freshmen and sophomores was established in 1930. The Columbian College was assigned the responsibility of teaching upper level undergraduate courses and the courses leading to the Master's degree. Instead of the School of Graduate studies, Ph.D. programs were placed under the administration of the Graduate Council. Many of these structures were criticized by accrediting bodies and in the sixties, the Columbian College of Arts and Sciences and the Graduate School of Arts and Sciences came into being.

the Columbian School today

In 1995, Professor Edward Caress traded in his chalk and place in front of the blackboard for the Office of the Dean. Caress, who in 1971 began his administrative career as a dean in the old graduate school and had been a chemistry professor at GW since 1965, was selected as the interim dean of CSAS which until that time had been known as the Columbian College and Graduate School of Arts and Sciences. He re-

placed Linda Salamon who vacated the position to become the Acting Vice President for Academic Affairs.

At the outset, Dean Caress felt that after 30 years he knew how the school operated. "I thought I knew a lot about how the school worked and I discovered I didn't know as much as I thought I did," said Caress. He was amazed by the variety of student and faculty interests and activities both in the university and as members of the community.

The event that Dean Caress was most pleased about was the Celebration of Student Achievement that took place the day before the Commencement ceremony in May. The idea for the ceremony arose from the fallout of the 1995 Commencement debacle. For 1996, administrators wanted each school to do something that could stand on its own in the case the events of 1995 reoccurred.

The school also conducted an unusually high number of faculty searches, most of which were successful, meaning that their first choice accepted the position. Thirty new professors were selected to begin working in 1996. Of the 30, two of the professors were hired to new positions increasing the size of the School's full-time faculty to 356.

Emphasizing Excellence

he sight and sound of ambulances racing throughout Washington was so common in the nineties that many people didn't realize that pre-hospital emergency care had only been around since the early seventies. The rapid growth in emergency medical services created a need for skilled managers and clinicians who could take leadership roles within the industry, an industry which had traditionally not required a college education.

To fill that void, the School of Medicine and Health Sciences established the Emergency Medical Services Degree Program in 1985. The first class entered in 1987 to a program that balanced outstanding paramedic training with other aspects of EMS such as business and finance.

In keeping with the School of Medicine's tradition of outstanding clinical training, students training to become paramedics underwent a rigorous year-long program that included 1,800 hours in the classroom and in clinical settings. In comparison, an undergraduate taking five classes each semester spent about 350 hours in class (excluding lab time) over the course of a year. The program's length, which exceeded national guidelines several times over, was due to the extensive clinical experience and higher level of classroom training.

Paramedic students were taught at a level close to that found in nursing programs, sometimes taking the same classes as physician assistant students. Each week, students spent sixteen hours in local hospital training in a variety of departments including the emergency room, intensive care unit, operating room, dialysis, and obstetrics. That was supplemented with time out of the hospital riding with paramedics in Fairfax, VA.

"The time that is spent on rotations is well worth it," said Katrina Dandie-Blackwood, "That showed me

how important our care was because we get to track patients. That let's me know that if I hadn't take care of the patient correctly he wouldn't have made it that far."

Students had praise for the instructors and camaraderie that developed between them and the students. Instructors were concerned about the student's learning and willing to go over trouble area one on one. A family-like atmosphere developed among the handful of students who were all taking the same classes which were often taught by the same instructors. "You begin to rely on them [instructors] and there's no reason to hesitate to ask questions," said one student. Katrina said, "It's like a different universe within the university."

Concerned about making sure that students were trained to the same level that they would be expected to perform at once they began working in the field, the faculty established one of the steepest grading scales at the university. While 90 percent in a class may have bought most students an A-, students in the EMS program had to average 95 percent to receive an A- and As were given out for averages of 98 percent and above.

Some members of the program and students who took part in the EMT- Basic class also gave back to the community through volunteer work. Many of the communities in the Washington suburbs offered students the opportunity to work as volunteer EMTs and paramedics where they could make use of their training to help others. A group of program members, led by Jacob Abbott, also worked to establish an emergency medical response group that would respond to medical emergencies on campus.

The program's motto was "Quality in EMS is a matter of degree." By most measures the degree that graduates received was of the highest quality. Faculty member Brian Maguire noted that in his travels throughout the country he found that the GW EMS Program was among the most highly regarded EMS programs in the United States.

Paramedic students practice the skills involved in performing advanced cardiac life support during an in-class laboratory session.

Gelman Library

One of the lesser recognized gems of GW was the Gelman Library. Students, professors and other members of the GW community checked out over one thousand items each day from the library, whose services, special collections, and various exhibits were vast.

While many students only used the library for research and quiet studying, a few clued-in people took advantage of some of Gelman's hidden gems. Examples included being able to check out films and watch them for free in the audio-visual room on the lower level. Another Gelman goodie was the lesser-known IBM and Mac labs, also on Gelman's lower level. In addition were the books and articles that many professors kept on reserve.

Not every was enamored with the Library, however. Many students were significantly dissatisfied with Gelman's offerings -- although the library boasted a collection of over 1.3 million books, students often found those titles to be either out of date or impossible to locate. "The one issue of the magazine that I want," complained freshman Matt Green, "always seems to be the one that's missing."

Consortium borrowing was also a large hassle; students who waited until the last minute to complete their research projects found themselves up against a 10-14 day delay or spending a day roaming the libraries throughout the area that were part of the consortium. Also, while the library also maintained a 24-hour study lounge as well as other study

rooms throughout the library, many GW students complained that the furniture was old and outdated. Some furniture on the fifth floor dated back to the day that Gelman opened in 1970.

The University Librarian, Jack Siggins, addressed these concerns. He cheerfully announced that he was aware of the problem and detailed several measures to improve Gelman's resources. Upon Siggins' arrival at the University in 1995, Gelman was given \$500,000 for immediate book acquisitions. Siggins said that other improvements were also in the works, including \$100,000 work of new furniture and carpeting. The new study room furniture would have docking stations so that students could plug their computers right into GWIS and Aladin Siggins said.

The Gelman Library also hosted several special activities and exhibitions throughout the year. In addition to the popular Cafe Gelman, where students enjoyed coffee and jazz music, there was also a special exhibition series. A Black History Month exhibition, as well as exhibitions on the library's rare and unusual map collections and on the history of Foggy Bottom, were among the featured presentations.

Usage 1994-95

Entrance Count	1,394,436
Circulation charges	487,784

BOOK EXCHANGE

The SA Book Exchange was a major success. Held January 16th through the 19th in the Marvin Center, there was a fifty percent increase in the number of people who came to register books for sale. The exchange also reached a new high in terms of amount of money exchanged between students, nearly \$22,000. The idea to hold a book exchange had been bouncing around for years when then-SA Senator Mark Reynolds, set out to make it a reality. He worked hard to obtain permission from the bookstore and the university to hold the exchange.

The first exchange in the spring of 1994-95 saw about 500 people register books for sale and total sales were in the neighborhood of \$12,000. David Petron, a student organizer, experienced difficulties in setting the exchange up. One of the most pressing problems was compiling a list of books needed by professors for the spring semester. "The bookstore compiles a big list of all the books. They wouldn't give us the list. We've had to compile it ourselves which is a lot of work. I got back to campus on New Year's Eve and I spent a solid two weeks, about 5-6 hours a day, here late at night compiling our list," David Petron said.

Petron compiled a list based on the course adoption forms filled out by professors listing the books they planned to use. Petron used the copies of the SA got from professors to compile the final list. The master list was more than 130 pages this year and the SA hoped to be able to work on negotiations to save time and resources to get access to Follette's master copy.

"We have a lot of people who come in and don't know what books they need. So they look on the SA's list, but because of the amount of time it takes us to compile this list, it's not absolutely accurate. There are also a lot of course adoption forms that come in late from professors and never get included on our list," Petron noted. "Future plans include working out a deal with Follette for their list and as more people begin to see the book exchange as an alternative way to buy their textbooks, it's going to grow even more."

To help offset some of the costs of holding the book exchange, the SA placed a service charge of \$1 on students who sell their books for over \$5. This is to help defray some of the costs of advertising and supplies needed to run the exchange. On one last note, Petron said, "We've gotten a much higher degree of cooperation from the University and the bookstore now and it seems like they are perfectly content to let the book exchange go on. At this point, I think it's a popular enough program that they (GW) would not be able to take it away from the students."

One of the rites of the new semester was heading to the GW Bookstore for the biannual soaking. Students complained about the high prices charged, which were sometimes higher than in other area bookstores, and the low price paid for used books. The low price paid and the high cost charged led students to try alternatives such as the Book Exchange.

School of Medicine & Health Sciences

When Dr. Robert Keimowitz first came to GW in 1970, Ross Hall was a giant hole in the ground, the medical school was still located at 13th and H St., and terms such as managed care and HMOs were rarely, if ever, heard. Since then, advances in medical science and technology have resulted in the treatments of yore being supplanted by more effective ones while the cost of providing health care has begun to garner headlines larger than the most revolutionary advances in medicine. Coping with these changes and those that are yet to come is a constant challenge for Dr. Keimowitz, who, as Dean of the School of Medicine and Health Sciences was responsible for guiding the medical school into the future.

Dr. Keimowitz had taken a position in California when he heard of an unusually exciting program at GW. He decided not to leave the east coast and came to GW as an Assistant Professor of Medicine. The following year he was appointed to the Admissions Committee and became chairman in 1972. In 1977, he was named the associate dean for student affairs and admissions and in 1989 became the dean for academic affairs. While his days were spent primarily dealing with the students and faculty of the M.D.

program, he still found time to practice his specialty, internal medicine, on one day each week.

The medical school in the early 1970s was not nearly as solid as it was in the mid-1990s. It was, however, a far cry from the medical school that Abraham Flexner saw in 1909 when he was studying medical education for the Carnegie Foundation. After reviewing the medical schools in the District of Columbia, Flexner concluded that GW's medical school, along with Georgetown's, lacked adequate resources and were not up to the task of training physicians. He predicted that only Howard University had an assured future in medical education.

Improvements were already underway when the Flexner Report was released in 1910 and by the 1920s the school was known for its outstanding clinical training. That reputation continued to the present with U.S. News and World Report ranking GW medical school as the #2 comprehensive medical school in the United States in 1993.

Partly due to the school's reputation and partly due to its location, GW medical school was the most popular school among medical school applicants in 1995. More than one in four medical applicants applied to GW, part

of an upward trend in applications that Dr. Keimowitz had observed since 1988. He said he was happier when the applicant pool was smaller because the people coming to medical school were the ones who could work on Wall Street if they wanted but who did want to do that. He was still impressed, however, with the combination of intellectual strength and compassion he saw in medical students.

If given the chance to change a single aspect about the medical school, Dr. Keimowitz said it would be to endow it substantially. GW had always had an undercapitalized faculty and more money would be useful to increase the size of the basic science faculty and underpin the support of the faculty. It would also help make the school less dependent on tuition. He was also concerned for the future of funding, not only for the medical school but also the medical center. "Medicine is changing radically both by market forces and government funding," he said.

One of the problems was the movement of medical care out of the hospital setting. Although a resident spends 95% of their time in an inpatient setting, only 5% of their practice time will be spent in the hospital. Correcting this imbalance was difficult because the lack of government funding to support training outside the hospital.

Robert Keimowitz,
Dean for Academic Affairs

Outgoing Board of Trustees Chairman Oliver Carr (right) shakes hands with the incoming chairman John Zeglis. Zeglis, who had been a member of the board since 1990 was a senior vice president and general counsel at AT&T.

Stephen Joel Trachtenberg, University President

Linda Salamon, Interim V.P. for Academic Affairs

Louis Katz, Vice President & Treasurer

In the late 1960s, the GW Security Service became the University Police Department due to the increased demands placed on it by student unrest. Today officers patrolled the campus in cars, on foot and by bicycle. The UPD also ran the university escort service that shuttled students around campus at night.

Hospital ails continue

Financial problems continued at GW Hospital. Layoffs were announced in July as managers continued to restructure the operation to cut costs and make the facility more appealing to prospective buyers. In FY1995 the hospital had 17,868 admissions with an average 84% of its beds filled. The emergency department treated 48,329 patients, making it the second busiest in the city. The adjacent ambulatory care center had 352,540 patient visits.

Michael Worth, Vice President for Development

Allan Weingold, V.P. for Medical Affairs

Law School receives \$4 million

The National Law Center received the largest gift in its history from living donors: \$4 million from the J.B. and Maurice C. Shapiro Charitable Trust. The contribution, to be matched equally by the University was to help enhance programs in public service and environmental law, create two endowed chairs, and increase support available to law students. Dorothy Shapiro presents President Trachtenberg with a crystal bowl at the ceremony. Law school dean, Jack Friedenthal is pictured to the left.

V.P. Linda Salamon talks with students at the annual student leadership conference.

Endowment Campaign Kicks Off

In February the university kicked off its first endowment campaign in almost 10 years. The Centuries Campaign had a target of raising \$300 million. In addition to boosting the endowment by \$170 million, \$100 million was earmarked for to support current operations and \$30 for new and improved facilities. Campaign Chair Oliver Carr recruited outstanding chairs to head the individual school campaigns. At the end of the 1996 fiscal year, many had exceeded 40% of their targeted amount and two schools, Engineering and the Columbian School exceeded 50% of its targeted goal.

First you searched it one way, then another way, then every which way trying to find the right school. Somewhere along the line most high school students used one of the dozens of college guides to help them select what school would be best for them. Beyond the basics such as enrollment, average SAT scores, and majors found in Barron's there were books that offered more interesting information. Princeton Review classified GW as a highly competitive school (even though most who apply get in) and noted that GW has been called a "segregated melting pot." In the head to head rankings, U.S. News and World Report once again put GW in the second tier of national universities and the Princeton Review ranked GW as the #3 party school in the United States.

Walter Bortz, V.P. for Administrative & Info. Services

Robert Chernak, V.P. for Student & Acad. Support Services.

Recruitment Effort Draws Fire

Just as GW was getting out of the headlines for Commencement '95, news broke that GW was recruiting a basketball player who had been convicted of sexual abuse. Richie Parker was viewed as one of the best guards in the country and a shoo-in for a basketball scholarship at a Division I school until he ran into trouble with the law.

According to prosecutors, in January 1994 the 6'5" Parker and a schoolmate lured a 15 year-old girl into the stairwell at the Manhattan Center High School for Science and Math where they forced her to perform oral sex. Both were charged with first degree sodomy, which carried a minimum prison sentence of two years. In early 1995 Parker pled guilty to a lesser charge of felony sexual assault and was sentenced to five years' probation. The victim subsequently filed an \$11 million lawsuit seeking compensation for physical and psychological damages.

Less than two weeks after he pled guilty, Seton Hall University, bending to pressure from within its community, informed Parker that his scholarship offer had been rescinded. Other schools that had been recruiting him also turned a cold shoulder. GW didn't lose interest and in early May, Parker made a recruiting visit to the campus.

The visit touched off what would become a firestorm of criticism against the school for considering the possibility of providing a scholarship worth over \$100,000 to a convicted felon. Parents, students, and the public at-large wanted to know why GW was doing this. How low would GW go to recruit a good basketball player? Who deserved a second chance?

University officials were hampered in responding to these questions because of NCAA rules that

prohibited a school from discussing anything related to the recruiting of a player until the player signed a letter of intent or the school announced that it no longer had a recruiting interest. Violation of the NCAA regulations would've made it impossible for Parker to play basketball for GW if he were to attend. Vice President Robert Chernak explained at Colonial Inauguration information sessions that while he would like to be able to address their concerns, he couldn't do so because of the NCAA regulations, something that was of little relief for the audience.

Right after Parker and his victim settled their lawsuit, GW offered her a full scholarship similar in size to the one Parker would have received even though she still had two years of high school left. While the scholarship was conditioned on her meeting normal admission requirements, it supposedly had nothing to do with Parker's recruiting situation. People following the story couldn't help drawing a connection and soon officials were fending off new waves of criticism.

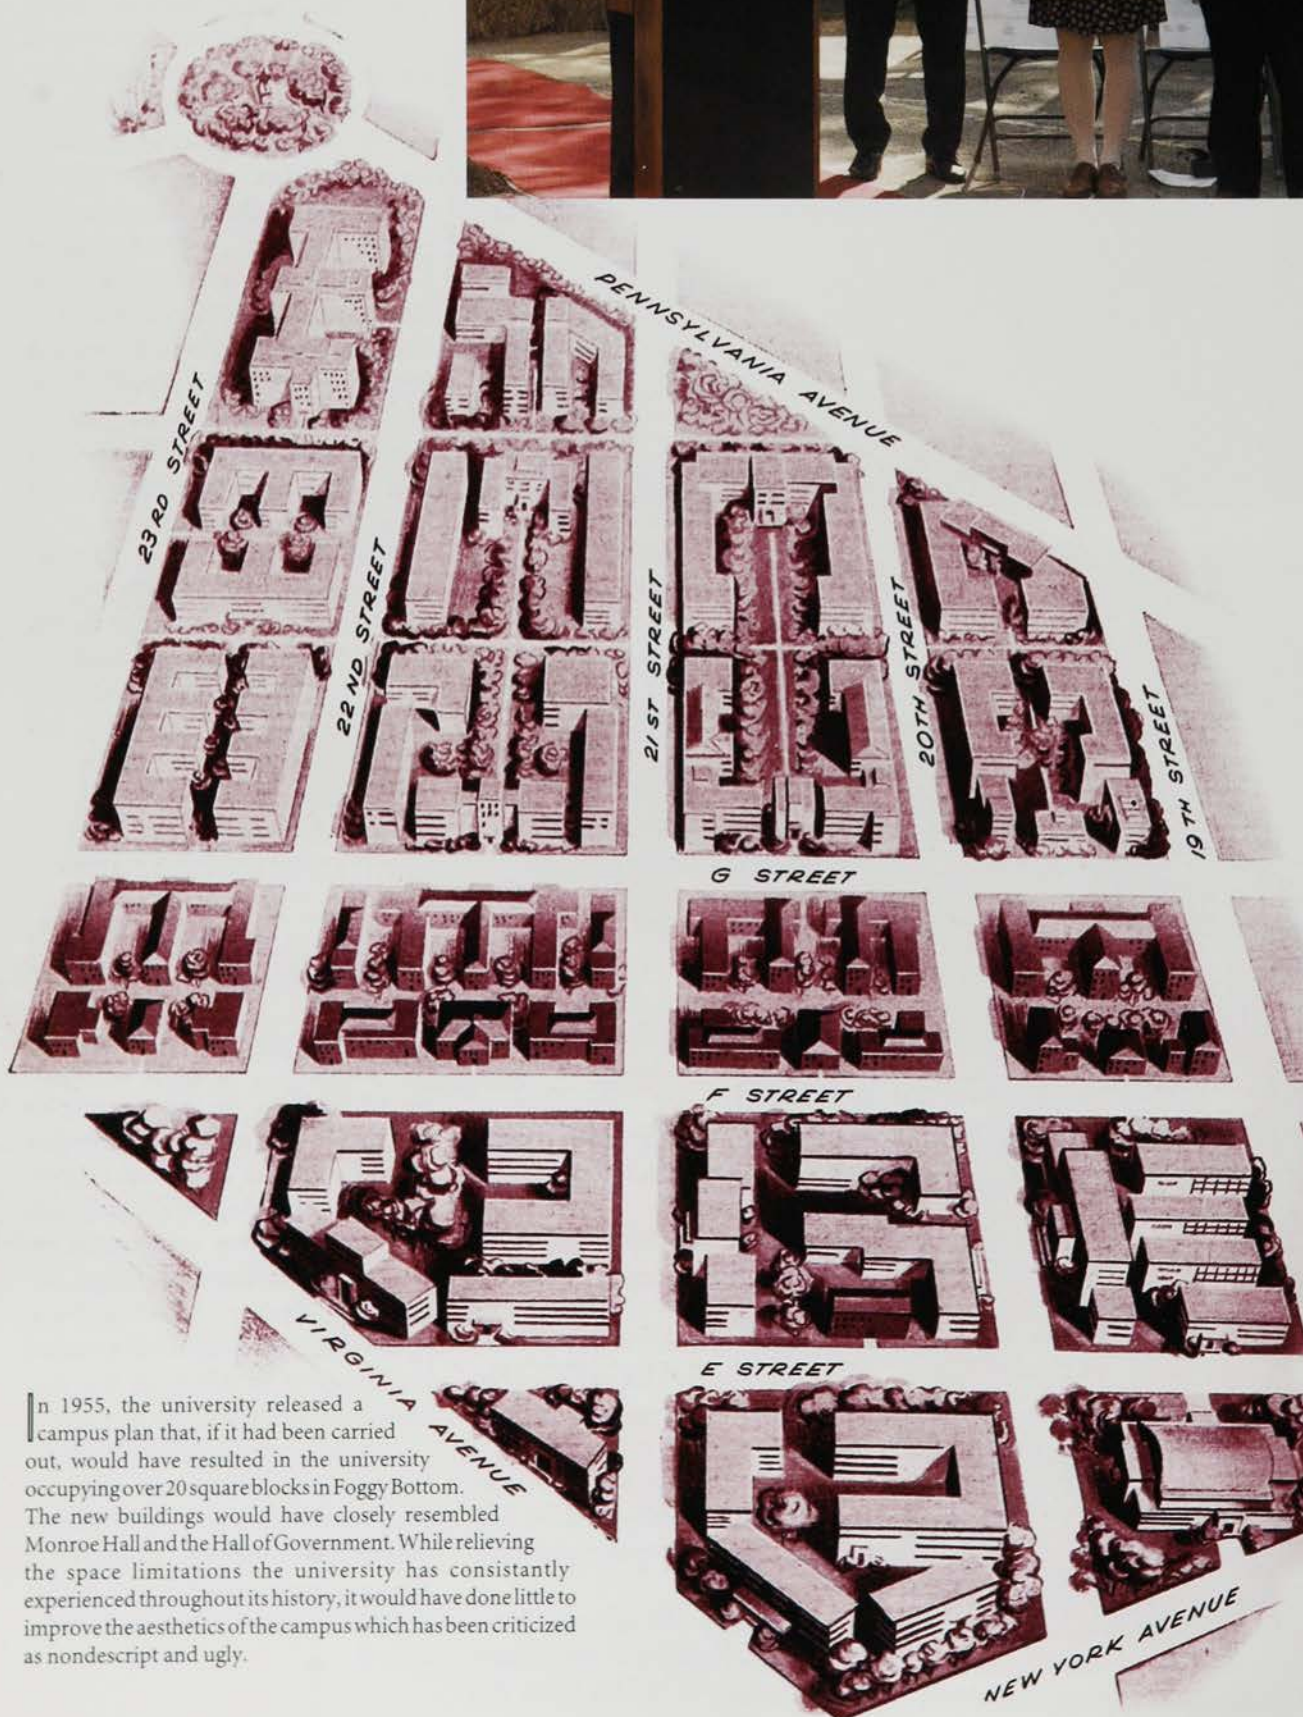

Because of the unusual nature of the situation, the Board of Trustees scheduled a special meeting to discuss whether the university should continue to recruit Parker. That meeting was never held as President Trachtenberg announced on June 29 that GW was no longer recruiting Parker. Trachtenberg reached the decision after a senior staff meeting in which all the vice presidents and deans participated.

Parker ended up attending Mesa Community College in Arizona which had an open admissions policy. Mesa officials announced, however, that Parker would not be invited to play basketball for the school.

President Stephen Joel Trachtenberg, University Marshall Jill Kastle, Student Association President Mark Reynolds, Residence Hall Association President Shana Greatmen, and Christopher Spiron kick off the ground breaking ceremony for the new residence hall scheduled to open in the fall of 1997.

Kathy Neuchieba

In 1955, the university released a campus plan that, if it had been carried out, would have resulted in the university occupying over 20 square blocks in Foggy Bottom. The new buildings would have closely resembled Monroe Hall and the Hall of Government. While relieving the space limitations the university has consistently experienced throughout its history, it would have done little to improve the aesthetics of the campus which has been criticized as nondescript and ugly.

Under Construction

Students could not go to any class without noticing the various construction projects that were on around them. Lisner and Stuart Halls, two of the first buildings at the Foggy Bottom campus were the focus of a renovation to create more functional and pleasing space. Exposed piping and other shortcuts taken when the buildings were originally built during the Great Depression were enclosed and systems upgraded.

Due to the construction, some professors in the Finance department had to be temporarily relocated to the Park Lane building on Street which also housed the *I* Magazine. The area formerly known as George's was renovated to create three classrooms that would help make up for the classroom space lost during the construction.

Kathy Henschel

Kathy Henschel

Students, Members of the Board of Trustees and administrators participated in the groundbreaking of the first new residence hall built by the university since Strong Hall was built in 1935.

MAKING THE GRADE

Is 'A' really for average? Times change, student change, and trends in grading have changed along with them. Only two departments gave A's to more than a fourth of their students in 1953. 42 years later in 1995, there were only nine departments had less than 25 percent of students receiving A's and two-thirds of all departments gave more than 70 percent of their grades in the A and B category. This didn't seem to raise the same complaints that arose in 1954 when the Middle States Association of Colleges and Schools said in its evaluation of GW that "there would seem to be no justification for a department to assign 69% of its grades in the A and B categories." While students were receiving more A's in 1996 it is also important to remember the average quality of students has improved dramatically from the students of 30 or 40 years ago.

The backbone of any research program are the graduate students who help shoulder the load. Nick Lynn (left) and another graduate student demonstrate software developed by the Institute for Reliability and Risk Analysis.

The Institute for Reliability and Risk Analysis and its director, Professor Nozer Singpurwalla, are heavily involved in developing methods of predicting events and the reliability of equipment through the use of Bayesian statistics. Unlike classical statistics which depend solely on the frequency of events observed, Bayesian methods include a subjective factor: what do you think will happen? These methods are useful when dealing with complex problems, very little evidence, and strongly conflicting opinions. For example, predicting the failure rate for rarely-used backup generators at nuclear power plants or deciding which of several medical treatments may be the best. The Ford Motor Company enlisted the services of Professor Singpurwalla and his team a few years ago to develop software that would help predict the amount of money that should be set aside to cover warranty claims.

Research

The discovery of new materials that can radically alter the way people live has often occurred with the aid of measurement apparatus. Chemistry Professor Akbar Montaser built his career on investigating new and more effective ways to measure substances present in trace amounts.

Going back over twenty years, Professor Montaser played an outstanding role in the development of techniques for the quantitative determination of the elemental composition of materials through the use of inductively coupled plasma spectroscopy. His work helped to revolutionize the way multiple constituents in a substance are analyzed. In addition to being able to detect elements at much low concentrations, improvements have made it possible

to more accurately identify the substance under study.

The applications of his work cut across a variety of areas from detecting pollution to medicine. In medicine, for example, the spectroscopic methods being investigated could make it possible to use trace elements instead of radioisotopes as metabolic tracers for following metabolic reactions and where products travel to.

Professor Montaser has published and presented over 230 papers so far and is the co-author and co-editor of the book *Inductively Coupled Plasmas in Analytical Atomic Spectrometry*. This book was very well received and referred to by one reviewer as the bible of ICP spectroscopy.

Centers of Excellence

Cyberspace Policy Institute

Established in 1993 as a center for the analysis of policy problems which have a significant technological component.

Intergovernmental Health Policy Project

It is America's only independent, university based organization devoted solely to research and reporting on health care policy at the state and local levels. Established in 1979.

Space Policy Institute

The Institute conducts research on space policy issues, organizes seminars, symposia, and conferences on various topics and offers graduate courses on space policy. Established in 1987.

Institute for Equity and Excellence in Education

It was established to promote systemwide educational reform, improve student achievement, and help school systems to target excellence for all students.

Notational Engineering Lab

Studies the properties and representational capabilities of existing notations and explores no abstractions that can form the basis of brand new kinds of notational systems.

Institute for Artificial Intelligence

founded in 1983 to pursue an interdisciplinary approach to the research, development, testing, and evaluation of better approaches to knowledge asset management.

National Clearinghouse of Bilingual Education

Funded by the U.S. Department of Education to collect, analyze, and disseminate information relating to the effective education of linguistically and culturally diverse learners in the U.S.

National Crash Analysis Center

Sponsored by the Federal Highway Administration and the National Highway Transportation Safety Administration to conduct vehicle crashworthiness research.

The Communitarian Network

A coalition of individuals and organizations that have come together to shore up the moral, social, and political environment. Believes that individual liberties depend upon the bolstering of the foundations of civil society: families, schools, and neighborhoods.

National Indian Policy Center

Established to create a permanent American Indian information and research institute.

Center for Nuclear Studies

Basic objective is to contribute to world's understanding of the dynamics and structure of the atomic nucleus, sub-nuclear, and sub-subnuclear levels. Much of its research is geared to the Thomas Jefferson national Accelerator Facility. GW is a charter member of its governing body.

Martin Bernal of Cornell University and Mary Lefkowitz of Wellesley College debated the issue of Afrocentrism in a debate sponsored by The New Republic Magazine, and a number of academic departments. Bernal authored *Black Athena- The Afroasiatic Roots of Classical Civilization* and contended that Africa deserves more credit than it has been given for contributions to western culture. Lefkowitz, author of *Not Out of Africa: How Afrocentrism Became an Excuse to Teach Myth as History*, took the opposite stance.

John Updike signs copies of his latest book, *In the Beauty of the Lilies*, at GW Bookstore. Afterwards he delivered a speech and read excerpts from the book.

Secretary of Labor Robert Reich addressed the issue of corporate responsibility in a February 6 address titled, "Pink Slips, Profits, and Paychecks: Corporate Citizenship in an Era of Smaller Government." He asserted that corporations have economic and social roles. They should therefore take social responsibility for to reverse the widening pay gap between skilled

workers and those whose skills were less marketable. He paid tribute to the SBPM's CEO of the Year, Aaron Feuerstein of Malden Mills in Methuen, Massachusetts. Feuerstein was honored in part for his commitment to rebuild Malden Mills and keep all of its employees on the payroll after the textile factory was leveled by a fire just before Christmas in 1995.

Students organize to pay for the construction of a gymnasium and establish a sports program

1825

A varsity football program is established. They went 2-2 in their first season.

1890

The men's relay team wins the national championship, the first for Columbian University.

1898

The men's rifle team wins their first national championship. It would be that start of GW prominence in rifle competition.

1910

The football team posts a 7-2 record. It would be the best record they would ever achieve.

1936

Football team is victorious in the Sun Bowl.

1957

Led by center Joe Hollup, the men's basketball team is invited to its first NCAA tournament.

1955

The Board of Trustees vote to discontinue football as a varsity sport amidst student apathy and losses of \$250,000 per season.

1966

Wrestling is discontinued as a varsity sport

1981

Just four years after posting a 1-27 record, the men's basketball team makes it to the 'Sweet 16' of the NCAA tournament.

1993

Imported talent

The men's soccer team looked overseas this summer for some help for their squad. The Colonials brought over three Englishmen and a Welsh who provided a spark for the team on offense and defense. One of those imports became a major offensive weapon for the Colonials.

Chris Jones, from England, led the GW men in scoring on their way to 9-7-1 overall record. Jones was also named the Atlantic-10 Rookie of the year and also made the A-10 all-conference first-team. The other imports contributed to a serious defensive improvement. "They strengthened our back line and as a result cut down on the goals we allowed" Assistant Coach John McNamara said.

Matt Ferry missed the entire 1994 season due to injury and was a medical redshirt as was his brother Ben who played in just two games. Also redshirted due to injury was junior midfielder Ali Mesbahi. Factoring in the three players returning from redshirting last season, the Colonial men had 7 new starters for this season.

In a season where the men suffered three close overtime losses to American University, Virginia Tech, and Xavier, Jones provided some assistance for the Colonials. In the 2-1 overtime lost to Xavier, it was Jones who scored the tying goal before Xavier scored in the overtime period to win the game. He scored two goals in the overtime periods to lead GW to a 5-3 victory over The Citadel. Jones also scored two goals and had an assist in a GW victory over St. Joseph. Also GW lost a close

one to American University 4-3 in overtime, after trailing at the half-time and battling back to tie the score, the Colonials lost when AU scored with less than ten minutes to go in overtime. The Ferry brothers, returning from being redshirted last season, played well alongside their new teammates.

In the season ending 3-2 overtime victory against Duquesne, Matthew Ferry scored two goals but the winning margin was provided by Andrew Dykerman who scored the decisive overtime goal. The Colonials' season was filled with inconsistency. Most of the problems stemmed from getting used to playing with one another. "We started off 3-0. Then it (inconsistent team chemistry) showed in the middle of the season when we dropped a couple of games" Assistant Coach McNamara said when asked about this group of players. The good news is that GW men's soccer returns those same 7 key players next season to battle through another tough schedule in the Atlantic-10.

RESULTS

United and victorious

The 1995 season was not quite what was expected of the women's soccer team. Partly due to injuries and poor play, the Colonials finished with a hard fought 8-8 record. The Colonials played most of the season without their starting goalkeeper Traci Jensen who was lost to injury.

The women opened the regular season with a 2-1 lost to Hartford. A game their coach referred to as their best game of the season even though they lost. Coach Shannon Higgins-Cirovski said they played well at times throughout the season but this game was the best game according to her memory, during the season. The Colonials followed that up with a 3-0 shutout of UM-Baltimore County. After losing Jensen for the season, Senior Adrienne Pheil was given the task of protecting the goal. Pheil had impressed the coaches last season when she filled in for Jensen. "Any-

time you have an injury, it will affect your team" Higgins-Cirovski said about the injuries to her goaltenders.

The Colonials enjoyed routes of LaSalle (7-0), St. Bonaventure (5-1) and went undefeated in the Atlantic-10 conference. The team though was plagued by an inability to defeat top-caliber teams. "The last six games of the season we played against the top teams in our region. We should have been peaking as a team during this time but due to injuries were not able to" Higgins-Cirovski said.

The Colonials though were able to string together a three game winning streak during the fall season that had their offense and defense playing their finest. Led by Chemar Smith and the Tanya Vogel, the offense came out firing against their opponents, outscoring their opponents by a goal ratio of nearly 3-1. This type of offense was evident in the blowouts but against stiff com-

petition such as UMass, George Mason University, and Virginia this team struggled. "You are going to hard time against the good teams," coach Higgins-Cirovski said, "We were not sneaking up on anybody. They scouted us."

One positive aspect of this season was the unity achieved among members of the team on the field and off. During flights to matches and stays in hotels, the Colonials bonded very well. "The biggest asset was the close net team atmosphere that was playing for each other" said coach Higgins-Cirovski. Next fall, this team has to continue to develop together and overcome their next obstacle.

"We needed to step up for those (big) games and we didn't" the coach said about her team. Once they do that, then they will achieve much more on the field.

setting new highs with their Top Killer

With two consecutive Atlantic-10 Championships in 1993 and 1994 to look back to and a solid group of returning players, the women's volleyball team entered their 1995 season as the team to beat in the A-10. Eyes were also on senior outside hitter Svetlana Vtyurina, who was on pace to break the all-time NCAA kill record. In her first three seasons, Vtyurina amassed 2196 kills (a kill is a shot not returned by the opponent), leaving her 736 short of the record.

The team went 6-2 in the matches leading up the start of the conference season. They won the championship at the Nashville Invitational Tournament after beating Duke, Oregon, and Tennessee. In the match against Georgetown, the team had a season-high 104 kills and 95 assists. Vtyurina posted an NCAA single-match record of 56 kills and co-captain Khuong Ta made a season-high 87 assists.

At the time, the team was without one of its key players, junior setter Kate Haubenreich who was out with injuries. She returned to the lineup in the match against Virginia Tech in late September. She recovered to average a league-leading 11.95 assists per game. In just 78 of the 125 games that GW played through the

A-10 Tournament, Haubenreich made 932 assists to move up to second on the GW all-time assists list, 247 assists shy of Tracy Webster's school record 3,838.

Their conference record was up to expectations, with a record of 18-2. The losses to Virginia Tech and Rhode Island were avenged by wins later in the regular season and in the A-10 Tournament. After losing to Rhode Island in 5 games, the team went on a winning streak that lasted 17 matches and ended when they were knocked out of the NCAA Tournament by #5 Texas.

As the season went on and Vtyurina came closer to the record of 2,932 kills set in 1992 by Javonne Brooks of the University of New Orleans, the countdown was on. She was the leader in kills among NCAA Division I players with an average of 7.18 kills per game. The record fell in a match against Duquesne on November 11. Vtyurina entered the match with 16 kills to go. The Colonials rolled over the Dukes in the first two games, allowing them only seven points. Things got tight in the third game as the Dukes' opposition improved and nerves began to fray. After six attempts to tie the record and two passing errors, Vtyurina put one across the net that was batted around but not returned. "It was the hardest 16 kills I ever got," she said. Cheered on by 1090 fans, including a raucous contingent of students also from her homeland, Russia, Vtyurina claimed the record as hers alone just moments later. Kate Haubenreich set the ball up for Vtyurina, who smashed the ball down into the middle of the court.

The other team members behind Vtyurina's record and the team's record cannot go without mention. Megan Korver, one of the top freshmen in the A-10, was named the Conference Rookie of the Week on October 16 after having five service aces in GW's first meeting with Duquesne and a total of 29 kills, 14 digs, and three blocks in the two matches played that week. She was named the Rookie of the Week on two other occasions and went on to be named the Rookie of the Year. Junior middle blocker Anna Krimmel was ranked just behind Vtyurina for the third highest hitting efficiency in the conference.

Freshman Kara Deringer (3) and junior Anna Krimmel (11) try to stop the ball as it comes over the net. Krimmel was among the conference leaders in blocking with top honors in that category going to freshman Megan Korver who led the A-10 with 1.39 blocks per game.

Senior outside hitter Jill Lammert prepares to block a shot from Massachusetts. She was the team's leader in digs, averaging 3.32 per game in conference play, ranking third in that category among Atlantic-10 players.

Curt Bergstrom

Curt Bergstrom

Curt Bergstrom

Curt Bergstrom

At 6 feet, 4 inches, senior Svetlana Vityurina was as dominating off the court as she was on. She ended her college volleyball career as the all-time leader in kills with 3,043 and was named the A-10 Player of the Year.

totally

Awesome

The water polo team ended the 1995 season with one of their best records ever, tying Navy for first place in the league and earning their highest ranking yet.

The season got off to a rocky start losing three of their first four games in conference play in the Eastern Water Polo Association. That was followed by a four game win streak that was brought to an end by national water polo powerhouse Navy. The team continued their strong play in the Wildcat Invitational against Villanova, Princeton, and Washington & Lee, defeating all three opponents. These victories put GW, with a 4-1 conference record, in a share of the league lead with Bucknell.

After posting a 6-2 record in the regular season, the team entered the

EWPA finals with confidence. "We got better as the season progressed," said head coach Andy Turnage. They won the first game against Bucknell but went flat against Richmond in the second game, knocking them out of first place in the Southern Division.

For most of the last game against #15 Slippery Rock, it looked as if the Colonial might not recover. With four minutes to go in the fourth quarter, the team rallied to close a four point gap bringing the score to 13-13. Freshman Jeremy Yamamoto stole the ball and scored to seal GW's first victory over Slippery Rock. The team's efforts earned them a #16 ranking in the NCAA/CWPCA poll, improving over the previous year's #20 ranking.

Building on success

Coming in the season, the cross country teams were a bit unsure of what to expect. The men's squad lost nine seniors from the year before and the women were also a relatively young group. The goals at the start of the year were simply to gain experience and learn to run at the collegiate level. What both teams accomplished was acceptable for the rebuilding year which each program had to undergo.

There were surprises. Junior John Hammond ran strong all season and was selected to the all-conference team by finishing 7th at the Atlantic-10 Championships. For the first time in the history of the GW women's cross-country team, a member of the women's team made the all-conference team. Sophomore Lauren Edwards accomplished that feat by finishing 6th at the A-10 Championships.

The year began on a positive note for both teams. "The first few meets we did very, very well," coach Greg Coan said. After the great start, the teams were not able to perform as well. The schedule became tougher and the teams endured some rough times. To the disappointment of coach Coan, neither team performed well at the conference championships but he had reasons to be encouraged.

"We had a very young team for the men," Coan said. He was concerned with getting the young men to "learn the process of running and getting them used to the five mile

(run) because they only ran three miles in high school." The men's team this year finished in sixth place overall in the A-10, only one place below where last year's team finished. The women's team also is promising for next year.

"The team had some very good meets earlier this season when we beat some teams that had beaten us last year. In our conference we did run too great but again part of the team is still very young. And we lost two seniors that ran very well for us but we won't lose a lot of people so that's very nice for next year."

Alexander "Sasha" Koul puts up a shot against Florida in the Franklin National Bank Tournament held at the USAir Arena. He was named All-Tournament. "Everytime I see him he gets better," a scout from the Los Angeles Lakers observed. Koul shot 62% from the field to lead the A-10 conference (he was #4 overall in Division I) and he made the second team All-Conference squad. He finished the regular season averaging 14.1 points and 7.7 rebounds in conference games. He scored a career high 29 points in the A-10 Tournament game against St. Joseph's, spearheading GW's 81-71 win.

Vaughn Jones maneuvers around a Florida player in the Franklin National Bank Tournament. Jones returned to playing forward with the addition of Shawnta Rogers to the lineup.

The starting lineup of Jones, Rogers, Evan, Koul, and brade huddle before the start of the last game against Rhode Island.

a season with No Small Games

Expectations surrounding the Colonial men's basketball season were high as the season got underway. A poll of selected media had the Colonials picked to finish second in the newly formed Atlantic 10 West Division. Alexander Koul, Kwame Evans, and Vaughn Jones were named to the preseason All-Conference teams.

Coach Mike Jarvis led the Colonials to their sixth straight winning season with a record of 21-8, tying for first in the West Division with a 13-3 conference record, and made it into the NCAA tournament field. This marked only the second time in almost forty years that a GW men's basketball team had won more than 20 games in a season. Seniors Kwame Evans and Vaughn Jones played a large part in GW's success. Once again, Evans was among the leading scorers in the A-10, second behind college player-of-the-year Marcus Camby. Jones was an indispensable component. He played four positions, including point guard and could come through in a clutch to score.

Early in the season the team struggled. After opening the season with two victories at home against Hartford and Hampton, the Colonials dropped two games in the Franklin National Bank Tournament, first against a tough Florida team and the next day against then #19 ranked Maryland.

The Colonials rebounded to win six straight

games. In a victory against James Madison on December 5th, Freshman Yegor Mescheriakov put on an offensive show against the Dukes. He scored 25 points on 10-15 shooting, and grabbed six boards in the Colonials victory. During the same streak, the GW men also won the Sacramento Holiday Classic. That tournament marked the debut of 5'3" freshman point guard Shawnta Rogers who would play a big role in helping to make GW a NCAA tournament team. Rogers' debut came in a victory over Cal State Sacramento. In that game, Vaughn Jones led the Colonials with 21 points and 8 assists. Rogers collected 12 points, 5 rebounds, and 7 assists. Their next game against the University of Idaho was a nail biter. The Colonials pulled off the 84-83 double overtime victory with the help of forward Kwame Evans who scored 22 points and Rogers who scored nine of his 18 points in the second overtime-including the last two crucial free throws to seal the victory.

But Evans really let it fly January 6th at Duquesne. He set a school record by hitting 8 of 15 three-point attempts on his way to a 30 point night. The Colonial team set a season high in three-point shots by hitting 11 and shot 52% from behind the arc. The team also turned the ball over 25 times but still beat the Dukes by a comfortable margin. The following week was rough to the

Yegor Mescheriakov shoots in an exhibition game against the Russian select team. Hailing from Belarus, Yegor was one of the latest foreign additions to the team and started 15 games.

Colonials as the lost to Missouri and began their conference season with two losses including a loss to then #11 ranked Virginia Tech. Against Virginia Tech, the Colonials rallied back from a half-time deficit and with 3 minutes left in the game, the Colonials found themselves leading. But the Hokies fought off the challenge to win.

In a matchup with Dayton, freshman J.J. Brade had his way with the Dayton defense. He scored 17 points and 7 rebounds, 11 of those points in a three minute stretch in the second half. Brade was forced into the lineup due to an injury to Yegor Meschiakov. Kwame Evans added 27 points to the effort going 10 for 15 from the field. "I was almost in a zone. I was feeling good," said Brade about his performance. "We played 40 minutes tonight and stuck with our game plan."

GW's revenge against Virginia Tech came the next week when the two teams would meet again, this time at the Smith Center. At the half, GW led 29-25, but a 10-2 run to start the second half blew the game open. GW served notice to the nation that it is to be taken seriously. "I feel the Smith Center is a great atmosphere to play in. I don't think nobody's gonna come in here and heat us this year because we have an attitude in the Smith Center. I think if we just go out and play hard in the Smith Center, we'll get the win," said Kwame Evans.

Another big home effort was against Temple which had never been defeated at the Smith Center. The Smith Center was jamming as the game tipped off at 12:06, broadcast live on ESPN. Early on, it was a poor effort by both teams. As usual Shawnta Rogers was up to his tricks for the Colonials, grabbing boards, feeding teammates, on the break, and hitting the outside shot. GW built a 24-16 lead in the first half but Temple led by Marc Jackson's strong inside play, fought back, closing to within two points. GW's lead at half-time was seven points. Kwame Evans emerged to lead the Colonials in the second half, scoring 17 points. But the real story was the Colonial D which kept Temple scoreless in the first 4 minutes of the half while GW went on its own 9-0 run. Shawnta Rogers sparked the effort with some superb passing- a long cross-court bounce pass to Evans for a fast break lay up. Rogers also led GW in rebounding with 11 boards and added eight assists, a performance that helped him earn his second A-10 rookie of the week award.

At this point in the season, the Colonials were still undefeated at home and in the midst of an eight game winning streak. The schedule was tough and the Colonials were playing almost every other night. "I think the most important thing to remember is it's really not going to mean anything unless we continue winning. And that is what we got to do. And if we continue to win, then this stretch will be part of what helped us get into the

Co-captain Kwame Evans was the team's leading scorer and top three-point threat. He scored a record eight three-point shots at Duquesne in early January.

Ferdinand Williams an Xavier player while Darin Green makes his move for the basket. He scored 11 points that day, just short of the career high 13 that he scored against Maryland.

An exasperated John Chaney works off his frustration as GW surges ahead to its first victory against Temple several years. For the game, Temple shot 31% from the field. A little better than the 19% they shot a few days earlier in a loss to UMass. "We don't shoot the ball well, we are not good outside shooters, said Chaney.

Curt Bergstrom

Curt Bergstrom

NCAA tournament," Coach Jarvis said.

The streak was important but everyone had their sights set on the upcoming showdown with #1 Massachusetts. Going into the game, Jarvis said if GW practiced hard and played hard, the results would take care of themselves and they did. On the first offensive sequence for UMass, Alexander Koul blocked Marcus Camby's first shot attempt, setting the tone for a contest which GW dominated throughout. Vaughn Jones scored 21 points to lead the way and Kwame Evans hit a key three pointer with 1:59 to go in the game, helping stave off a desperate comeback by the Minutemen.

Shawnta Rogers, J.J. Brade, and Yegor Mescheriakov all contributed big time. Rogers and Brade combined on several fast break lay-ups. In fact, Brade did not miss a shot the whole

Alex Lo

game. Alexander Koul, at 7'1" and 296 lbs., held his own against Camby and UMass. He gave the Colonials a strong inside game to balance out the outside shooting of Jones and Evans. Koul finished with 14 points and 6 boards but his major contribution was keeping Camby from becoming a factor in the game offensively or defensively.

In the 1995-96 regular season, the Colonials proved that they could play with any team in the country. The Colonials also proved that the Smith Center was one of the craziest basketball arenas in college sports (for the men's team at least). "The home crowd gives you an extra boost," Coach Jarvis said but this season the Colonials gave much more to the crowd. They went undefeated in the Smith Center.

The Colonials ended the regular season on the road with a loss to St. Joe's denying GW the A-10 West Division title. That extra loss altered the bracketing for the A-10 Tournament so that GW met UMass in the second round. The Colonials kept it close but it would be UMass' day as it came away with the first victory over GW since the 1994 season.

In the first round of the NCAA tournament, GW (seeded #11) went up against the Iowa Hawkeyes (seeded #6). The game started out slowly for both teams but things settled down and for much of the first half, Iowa was in control. Iowa's Milliard came out smoking, hitting three three-pointers early to put Iowa out in front. GW battled back, led by Vaughn Jones, to trail by only one point at the half, 37-36. In the second half, Kwame Evans found the shooting touch that had eluded him in the first half. He nailed jumper after jumper, and the Colonials took command of the game for much of the second half, leading by as many as 17 points. With about 4 minutes to go, it seemed that GW had the game under control. Then Koul fouled out after scoring 20 points and the complexion of the game changed. Iowa, inspired by the crowd, launch a vicious comeback to take the victory 81-79. For the game, GW outshot Iowa 52%-48%, but down the stretch without Koul, the Colonials offense and interior defense collapsed. The Colonials season was over.

From the joyous high of a victory over the #1 ranked team in the country to the loss a few days later to lowly St. Joseph's, the Colonials experienced a turbulent season. The freshmen performed brilliantly at times, but at other times played like freshmen. GW would miss Kwame Evans and Vaughn Jones, but another era was just over the horizon. Names like Rogers, Brade, Koul, Green, Meschirakov, and others promised to make the future as exciting and tension filled as the 1996 season was.

Shawnta Rogers led the team in assists, free-throw percentage, and was the team's most accurate three-point shooter. He was named A-10 Rook of the Week three times and set a new school record for steals with eight against Missouri. Coach Jarvis described Rogers as being the piece of the puzzle the team was missing, a pure point guard.

Curt Bergstrom

Co-Captain Vaughn Jones weaves his way through the Rhode Island defense in his final Smith Center appearance where he scored eight points with eight rebounds and four assists. He became the 27th GW player to score 1,000 point in early February against Xavier where he scored a game-high 17 points.

After leading the A-10 in scoring during the 1995 season, Kwame Evans finished the 1996 season as #2 in scoring behind national Player of the Year Marcus Camby. He scored a career high 36 points against LaSalle.

Coach Jarvis, seen here during a time-out, wrapped up his sixth season at GW with the best record GW had achieved since the 1954-55 season, picking up his 100th win at GW and his 200th career win. A cloud descended on the program after the season when talk was heard that Jarvis might be a candidate for the coaching positions at Illinois, St. Johns, Northwestern and N.C. State. That was quieted when Jarvis signed a contract extension that would have him leading the Colonial men into the next century.

Queens of their court

The women's basketball team took to the court knowing that it would be hard to repeat the 1994-95 season when the team set a school record for victories, going 20-6 and making it to the 'Sweet 16' of the NCAA Tournament. In 1995-1996 the Colonials for the second straight season took the Atlantic-10 championship while establishing a new school record 15 wins in a row and going undefeated in the Smith Center. Their season though would come to an end in the second round of the NCAA Tournament at the hands of the Virginia Cavaliers. That loss could not obscure the wonderful season that the women had. They won 26 games and reaffirmed their position as the number one team in the conference going 14-2 in the regular season and then winning the A-10 tournament. It was hard to believe that this was the same team that lost to Southwest Missouri State and to Georgetown by 16.

A big part of the season's success can be attributed to the play of 6-2 center Tajama Abraham. With the loss of all-time leading scorers Darlene Saar and Debbie Hemery, someone had to step up. Abraham, who averaged 13.8 points a game as a sophomore answered that call, and was the leading scorer for GW averaging 19.5 points per game. Abraham was also the team's leading rebounder and shot blocker. She shot 56% from the floor while playing a career high 32 minutes per game. Before the season Coach McKeown said, "she has all the physical tools and has the ability to dominate certain games. I think TJ is ready to step up and be one of the dominant post players in America." Junior Lisa Cermignano led the Colonials in three-point shooting nailing 82 threes. She was the outside shooter that complimented the inside presence of Abraham. She was the second leading scorer for the Colonials and also second in steals. Conference opponents such as Dayton and LaSalle were no match for the

Colonials. Against Dayton, the Colonials ran out to an early 9-0 lead. In the first half of the game the Colonials totally outplayed the Flyers who shot 24% from the field and committed numerous turnovers. The combination of Abraham, Cermignano, and freshman Mandisa Turner scored 32 of the team's 39 first half points. Four of the five Colonial starters scored double figures and freshman Khadija Deas scored a season high 17 points while holding the Flyers to 35% from the field.

Against LaSalle it was pretty much the same story. GW ran out to a 6-0 run and with 8 minutes to go in the half, the women were up 26-6. Myriah Loneragan scored 10 points to put the half time score at 33-16. The Colonials defense stifled the Explorers, forcing turnovers and steals. In the second half, the Colonials came out flat, lethargic, and uninspired. Their lead had grown and the play of both teams was yawn-inspiring. Then the LaSalle Explorers took advantage of the sloppy play by the Colonials, butting the lead to 14, when Myriah Loneragan went down. She laid writhing in pain on the floor, with what was later diagnosed as a sprained knee, as play continued on the other end of the court. Even though the Explorers shot 11% from the field in the first half, they found themselves in contention with two minutes to go. The Colonials slammed the door on the comeback by hitting free-throws at the end.

Seniors Lei Hart and Myriah Loneragan were big parts of the Colonial team. Loneragan, with her aggressive playing style handled much of the point guard duties, driving the lane, head down and straight ahead while Colleen McCrea was out due to injuries. She finished the season with the highest scoring average of her career, 11.9 points per game. Hart was the decisive factor in GW's NCAA first round victory over the Maine Black Bears. Tajama Abraham kept the Colonials in the game

Coach McKeown amassed a record of 157-60 in his seven seasons at GW. 1996 marked the third consecutive time his teams made it to the NCAA Tournament and the fifth time in the past six years.

Expected to be the Colonials' starting point guard, junior Colleen McCrea sat out the first part of the season due to a stress fracture in her lower back. The team was 17-2 after her return to the lineup on January 13 against Virginia Tech. She had a career-high 19 points and a double double against Tulane. She was also named to the All-Tournament team at the Atlantic 10 Tournament.

Curt Bergstrom

Curt Bergstrom

Junior center Tajama Abraham takes the opening tip. She led the team in scoring and rebounding with 19.5 points per game and 9.4 rebounds per game. She was selected to the Atlantic 10 Conference First Team, was a two-time Player of the Week, and was a Pre-season All-America Selection.

Curt Bergstrom

Curt Bergstrom

Freshman guard/forward Vesna Perak was an offensive minded player who provided a spark off the bench, appearing in all but three games. A native of Belgrade, Yugoslavia, she had to go to Hungary to take her S.A.T. and camped out in front of an embassy to get a visa into the United States.

for much of the first half and GW was fortunate to trail by one at halftime. Maine's Cindy Blodgett came out on fire in the second half. She nailed jumpers from everywhere on her way to a 25 point effort. Lei Hart took over the Colonials. Determined not to be stopped, she did all she could to keep the Colonials close. She finished with 14 points, five rebounds, five assists, and no turnovers. Abraham also had a big game, scoring 22 points and snatching eight rebounds. In the second round against Virginia, the Colonials were stymied and that meant an end to the NCAA run. Virginia swarmed around Abraham and forced the Colonials to take bad, low-percentage shots. The #4 seeded Cavaliers took advantage of this to win easily, 63-42.

Front row: Christin Annie, Amy Atcher, Myriah Lonergan, Lei Hart, Lisa Cermignano, Desrene Lincoln
 Back row: Mark Diamond, Monique Ambers, Margaret McKeon, Colleen McCrea, Tajama Abraham, Shannon Dolan, Khadija Deas, Mandisa Turner, Vesna Perak, Joe McKeown, Gabrielle Butler, Chris Hennelly, Jimmy Pannett

Junior Forward Lisa Cermignano was second on the team in scoring and rebounding. She was also named to the Atlantic 10 Conference Third Team.

Undefeated since 1967

Up through the 1950s football enjoyed a large following at GW. Crowds numbering in the tens of thousands traveled to Griffith Stadium on Saturday afternoons to watch the Colonials. A series of losing seasons eroded student interest so that by 1966 less than 1,500 people showed up for games held in a stadium that could seat 49,000. Financial losses mounted but the Board of Trustees was hesitant to eliminate the program. With no relief in sight, the Board of Trustees voted in January 1967 to cancel the football program and use the savings to fund other sports and activities. 14 members of the team transferred to other schools to continue playing football while the remainder continued their education at GW.

The final season

GW won two of the three major football awards in the southern conference. Coach Jim Camp was voted "Coach of the Year" by the Southern Conference Sportswriters. Junior Guard Brad Cashman was voted the best blocker in the conference by the opposing coaches. The Colonials finished with a 4-6 record and were 4-3 in conference. Three players made the all-conference team, 4 made the all-conference 2nd team. Three players were Honorable Mention All-America and two were named Honorable Mention Academic All-America.

Great Performances

1956- GW won 7 lost 1 tied 1 then defeated Texas Western 13-0 in the Sun Bowl. Bo Austin was voted the Outstanding Player in the Sun Bowl game. This season sparked a debate on which team was better, the 1956 team or 1936 team.

1936- The team posted a 7-1-1 record. They scored major wins over Arkansas 13-6, West Virginia 7-2, and Wake Forest 13-12. They tied Mississippi 0-0 and lost to Rice 12-6.

1908- GW compiled an 8-1-1 record. Local headlines read "Two Points a Minute Against Maryland University." GW won 77-0 as the second half was cut to 25 minutes after a halftime score of 50-0. The team won the South Atlantic Football Championship by defeating V.P.I. (now Virginia Tech). GW won the game 6-0 after a heavy snowstorm held up play until 4:45 P.M.

The final record

In 58 seasons, the Colonials racked up a record of 208-241-34. In the time they were a part of the Southern Conference, their record was 53-73-4. In 31 of those seasons the team posted a losing record. In their best scoring season, 1908, they outscored their opponents by 268 points, 296-28. In their worst season, 1920, they were outscored by their opponents by 253 points, 37-290. Through the years, their opponents outscored them by 868 points.

The great rivalries

West Virginia- 24 games- won 7 lost 17
 V.M.I.- 20 games- won 7 lost 12 tied 2
 Virginia Tech - 19 games - won 8 lost 11
 Georgetown- 18 games - won 3 lost 13 tied 2
 Richmond- 17 games - won 8 lost 9
 Maryland- 17 games - won 4 lost 10 tied 3
 Furman- 15 games - won 8 lost 6 tied 3
 The Citadel- 14 games - won 11 lost 3
 Virginia- 15 games - won 2 lost 12 tied 1
 William & Mary- 23 games - won 9 lost 12 tied 2

Club ice hockey made a comeback in 1995. President Trachtenberg and Vice-President Chernak are presented with team jerseys during halftime of a basketball game.

Spirit Overload

It was a year of changes and firsts for the cheerleading squad. The squad made its competitive debut in the Universal Cheerleaders Association national cheerleading championships, placing ninth. Then there was the announcement of new Atlantic-10 Conference rules that prohibited cheerleaders from traveling with the basketball team to away games.

The squad was selected to compete in the UCA college nationals on the basis of a tape of the squad's routines submitted by Coach John Kelley. After preliminary rounds, they among 11 of the 35 teams that traveled to Disney World's MGM Studios in Orlando, Florida, that were selected to compete in the finals. "When they announced

that we'd made it to the finals you would have guessed that they'd won the whole shooting match from their reaction," said Kelly. After finishing ninth, the team's stay in Orlando was lengthened due to the blizzard that enveloped the northeast and mid-Atlantic regions. Three flight cancellations and numerous delays later, the team made it back to Washington.

One of the disappointments for the squad was the new conference rules that prohibited the squad from traveling with the basketball teams to away games. The change gave members more time to study and required them to miss fewer classes but took a bit of the fun out of the basketball season when traveling was one of the more enjoyable things the team did.

Being a member of the squad involved more than showing up for games, practicing two hours each day, and weight training. The squad also helped with local community and charity events such as the Harvest Moon Run for breast cancer research. As part of the 175th Anniversary celebration, the squad sponsored an alumni cheerleading event that attracted former cheerleaders from as far back as 1941 to fly in from around the world.

Remembering Bill Reinhart

No one else in GW history had as long-lasting affiliation with the Athletics as Bill Reinhart. Over a career that spanned four decades, Coach Reinhart coached baseball, basketball, and football. He was at the helm for GW's first appearance in the NCAA Tournament and led the basketball team to two Southern Conference Championships.

Reinhart was a coach at the University of Oregon where he was the first coach to win championships in two sports prior to coming to GW in 1935. In his first season as head basketball coach, his team posted a 16-3 record, the best to date in school history. From 1938 through 1941 he was also the head coach of the football team where he 16-17-1 record. He joined the Navy in 1942 and rose to the rank of Lieutenant Commander. After the war he returned to coaching in 1949 and stayed at GW until he retired in 1966.

In his last year as the basketball coach, Reinhart's team came back from an abysmal regular season in which the team posted 3 wins

to win the Southern Conference Championship and an automatic berth in the NCAA Tournament. In all he posted a record of 475-342 (.581).

Red Auerbach, who played under Reinhart in the 1930s credited Reinhart for being "20 years ahead of his time in basketball philosophy; he was the first to use the fast break in college."

Coach Reinhart had to overcome tremendous obstacles in putting together his teams. Athletic facilities were limited to one, then later two on-campus gyms that were appropriate only for practice and facilities located around the area. He had to convince prospective students that it would be a good for them to go to a school that didn't have any practice fields and where home basketball games would be held across the Potomac river at Ft. Meyer. Considering that, it was remarkable that for 24 years, (1929-1943, 1946-1956) the Colonials didn't have a losing season.

Ready, aim, fire

No other athletic team earned more recognition than the GW rifle team. The men and especially were highly recarded not only in-conference but nationally and internationally. Practicing in the basement of Samson Hall, the teams developed the skills necessary to take on the most formidable competition. In addition to the track team they were the only teams to ever win national championships and the only sport in which GW won multiple championships. The program was strong from the twenties through the early sixties when interest dwindled and the program was phased out.

Interest in student government continued to grow with voter turnout rising to a new high along with a large number of contestants in the races for Columbian College senate seats. However, less than 25% of the eligible voters made their way to the polling booth.

For the first time since 1991, both the Student Association President-elect and Executive Vice President-elect advance to office without a runoff election requires. President-elect Damian McKenna captured 41.1 percent of the 2,575 votes cast in what was high voter turnout. Executive President-elect Dianne Gayoski received 47.2 percent of the 2,244 votes cast.

Project 96 began back in January of 1995. Three year veteran, Curt Berstrom, and Jason Chautin, teamed up to head GW's first all color yearbook. The book's theme and basic structure was formulated with an editorial board summer retreat at Dewey Beach, Delaware. This three day retreat geared up the editorial staff, and at the beginning of the fall semester, there were more than twenty essential members who worked on book. ✂ This all color book posed a great number of hurdles for the staff. With new photographers and a relatively new staff, the first deadline passed on by and the catch up work started. All layouts and designs were created on the computer and the coordination of this massive project took more time and energy than expected. ✂ As the spring semester winded down and the students left for the summer, Curt took charge of production and with the help of a new color scanner, the book was able to be completed. The year turned out to be a learning experience for many and a hardship for others.

Brothers of Sigma Alpha Epsilon welcome a prospective member to their house. The chapter of SAE at GW was the only one to survive the Civil War.

Traditional events like Derby Days, the Goat Show, and fraternity and sorority formals used to be the highlights of the social season.

Greeks at GW

With fewer than one in six students participating in fraternities and sororities, Greek organizations in 1996 were but a hollow shell of their former selves. In the past Greek organizations held a much more prominent role on campus and for a brief period they were the only social activities on campus.

While GW was located at the 15th and H St. campus, the university didn't have any student housing and school-sponsored social activities were nonexistent. There was no student center or social amenities. President Charles Needham was of the opinion that GW's urban campus created a greater need to be a part of the fraternity or sorority system. President Needham promoted growth in the Greek system to fill the void in social life and enhance the sense of community. According to the late Elmer Louis Kayser, University Historian, "The essence of community life and activities was in the fraternity system."

Most of the fraternities located themselves in the DuPont Circle area. Some of them occupied old mansions until just after WWI. The fraternities frequently made their ballrooms available to nonmembers for student meetings. The financial crisis that gripped the university from 1910 to 1915 showcased the influence of the fraternity system. With the university forced to abandon athletics, fraternity leaders established and collected a voluntary tax to fund the athletics program.

Most organizations didn't even wait for the students to arrive on campus before they began trying to recruit them. Fraternities would scout the list of incoming students and assemble a list of desirable men. Brothers would latch on these people providing advice, setting up dates, etc.

The influence of the Greek system began to disappear after World War I when an enrollment surge reduced the camaraderie among students that made them an influential force in student affairs. The occurred again after the second World War because students were more mature and few had parents with ties to Greek organizations. The establishment of dormitories gave student another option in where to live so the prospect of having

Director of Bands and Professor Ben Fritz, With help from assistant band director and senior, Alex Benjamin, lead GW's pep band at both the men's and women's basketball games. With the 175th Anniversary fever setting in, the band members cheered for the Colonial players and worked with the cheerleaders to excite the crowd. ♫ The music program has expanded every year and the band does not just play at basketball games. The Symphonic Band held performances in the fall and spring, as well as at the Commencement ceremonies. Many select musicians also take part in GW's Wind Ensemble.

roadcasting to the Marvin Center and all 13 residence halls on 540 AM. Amanda Reiken, reads a public service announcement. Without a license to transmit over the air, WRGW had to operate as a carrier current station, its signal being carried over the power lines in the residence halls.

Curt Bergstrom

Curt Bergstrom

Scott Friel passes an afternoon mixing songs as a DJ on WRGW. He and the over 100 other on-air personalities helped keep WRGW on-the-air between 9:00 am and 2:00 am each day.

Curt Bergstrom

In addition to spinning disks, Jeremy Aaron and the other on-air members of WRGW were required to contribute to one of the non-broadcast departments within the organization. The station was the founder and co-sponsor of Colleges Caring For Kids, a non-profit group created to unite area college radio stations and the surrounding communities. CCK organized a benefit concert to benefit Pediatric AIDS/HIV Care Inc., which helped HIV infected children and their families.

Curt Bergstrom

Jon Tanebaum searches through the station's music collection. WRGW primarily programmed hip-hop and progressive music with other music tastes represented by various specialty such as Metal Works, Boot Party, At The Cross and Yellow Dog Blues. The station reported to CMJ, Beat Box, and Living Blues Magazine.

Sahlin Desai and Nili Asarawala pose to a traditional Indian beat as they parade on the runway. As Co-Presidents of the S.A.S., Gautam Gulati and Rajneesh Aggarwal took on their largest challenge by organizing the seven other cultural organizations into a single unified event: Spin the Globe. The seven others included Pakistani Student Assoc., Indian Student Assoc., SALSA, Philippino Cultural Society, Japanese Intercultural Network, Arab Club and Indonesian Student Assoc. The event included a performance from each of the clubs, as well as food from all regions of the world. \$1000 in proceeds was donated to the Whitman Walker Clinic.

Dandia Raas - or stick dance is demonstrated by Beejal Shah and Twinkle Vaidya

South Asian Society

The South Asian Society began their multicultural efforts with the Navratri

Garba in October, which was held in conjunction with the Indian Students Association. Garba is a traditional Indian Dance from the State of Gujarat.

All proceeds were donated to area Temples so they could maintain the facilities necessary for the community. ✂ In April, the 3rd Annual Bhangra Blowout took place at the Charles E. Smith Center. With sponsorship from the Program Board, 175th Anniversary Fund, the S.A.S, pulled off their largest event ever. A crowd of 1,500 people heard addresses from diplomats from Indai, Sri Lanka, and Bangladesh and saw a variety of performances of bangra-style dance. The S.A.S. donated \$1000 to each of Shriner's Hospitals and ASHA., again. This outstanding commitment to community service, multiculturalism, social and political awareness, and interorganization cooperation can only be accomplished with the hard working, dedicated board and its members.

Members of the solar car project put their second car, GW, on the starting line in two **solar car team wins in japan** races during the summer of 1995. Their first test came in Sunrayce '95, a biennial event

attracting entrants from colleges and universities throughout the United States. Problems arose early in the race when it was discovered that the adhesive used in the solar array had oxidized, increasing the resistance of the array when in direct sunlight and limiting the car's power to 300 watts. Favorable weather and the car's efficiency made it possible for the team to finish in 4th place behind MIT, Stanford, and Cal Poly Pomona, grabbing one stage win in the process. ✨ Late in the summer, the team went to Akita, Japan to compete in a race that included cars from around the world. With a repaired

solar array, the team put its car on the starting line of the 31km closed road course with high expectations. The team came away with victory in the university class, beating two teams that finished ahead of them in Sunrayce and taking third place overall. Honda and B. Paul, the first and second place teams overall, had millions invested their cars with Honda having spent \$40 million to manufacture its first-place vehicle, while GW was built with only about \$300,000 in cash and in-kind donations. The win also ended the team's bad luck streak which began in 1993 when their car was nearly destroyed during shipping and continued through Sunrayce '95.

Specifications

chassis

The chassis is made out of carbon fiber with the solar array built on honeycomb sandwiched kevlar.

Weight when empty- 350 lbs.

Weight with driver and batteries- 800 lbs.

Drag coefficient is 1.2. For comparison, the Ford Probe, one of the most aerodynamic cars on the market has a drag coefficient of 1.7.

electrical

Solar array is approx

2 meters by

3 meters generating

950 watts at peak

efficiency. Each cell

has 14.5% efficiency

and costs \$8.

mechanical

A single in-wheel axial flux motor propels the car. There is no transmission, reducing the weight of the car and improving efficiency.

Cruising speed (power only from the array)- 42 mph. Maximum speed (power from array and batteries)- 72 mph.

GW Solar Car Team

GW Solar Car Team

GW Solar Car Team

At a mid-day stop, Stephane Thirez helps the driver get out of the car. Sunrayce rules required teams to stop halfway through each day of racing during which time the team checked the car.

With the day's racing session over, the team's attention shifts to fixing any damage and topping off the batteries. Jessica Steps watches over the solar array while Fu-Long Wu and Steve Crain work on the car.

JOSHUA GUNN

Joshua Gresham Gunn, a communication major, was a producer and DJ with WRTV AM600, a lab supervisor in the Radio and Television program, and maintained the web pages for the Communication program. His senior thesis, entitled "Electronic Body Music: Logics of the Industrial Scene," explored the various symbolic elements of a local popular music scene. His numerous awards and honors included the Eaton Communication Scholar Award recognizing scholarly achievement in the field of communication, the Charles E. Gauss Prize recognizing excellence in the discipline of philosophy, and membership in "various sundry honor societies that want my money."

SCOTT MORY

Scott Mory, a political science and criminal justice major, was a Columbian College Senator for 3 years, a member of the 1995 Colonial Cabinet, STAR, University Hearing Board, and the RHA. He was the Student Co-chair of the Joint Committee of Faculty and Students and the JCFS Subcommittee on Academic Dishonesty which drafted the new Code of Academic Integrity. He worked as an assistant in the Office of the Associate Vice President for Academic Affairs, the Office of Undergraduate Admissions, and interned in the Department of Justice Office of Legislative Affairs. He was a recipient of the George Washington Award, Baer Award for leadership, NRHH Residential Leadership Award for outstanding contributions to residential life, a scholarship for student leadership development, and was named the Most Valuable Member of the SA in 1994.

AMY R.
EVENSON

Amy R. Evenson, an English major, was president and panhellenic delegate of Sigma Kappa, a STAR, vice-president of Order of Omega, and a member of the Dean's Advisory Council for the Greek system. She worked as a research assistant in the Division of Neurosciences of the Walter Reed Army Institute of Research and the Biology Department and as an undergraduate TA in the Biology Department. She also volunteered in the DC Public Schools and GW Medical Center. Her honors included three Outstanding Academic Achievement Citations, the Cutter Prize for excellence in English, the Chemical Rubber Company Freshman Chemistry Award and membership in Golden Key National Honor Society, Alpha Epsilon Delta, and Phi Eta Sigma.

MARK REYNOLDS

Mark Reynolds, a political science major, was president of the SA, a Columbian College senator, a resident assistant, a member of the 1993 Colonial Cabinet, and the RHA. He was the RHA member of the year in 1993 and received the Baer award for leadership. As president he instituted the DC Capital Consortium of student government leaders at universities in the Washington DC area and started the holiday bus service.

BARBARA L. ROBINSON

Barbara L. Robinson, a sociology major, came to GW after serving five years in the Navy as a counterintelligence specialist. She was a Naval ROTC Scholarship recipient and in the fall of '95 was selected as Battalion Commander of the GWU NROTC Unit. Her other activities included the GW Dance Project, the Muslim Student Association, Delta Sigma Theta Sorority, Inc., and working as a model and spokesmodel for agencies in Washington and New York.

MARLOW E. SPRINGER

Marlow E. Springer, a mechanical engineering major, was president of the Latter-Day Saints Student Association, a member of the American Society of Mechanical Engineers, Golden Key National Honor Society, Omicron Delta Kappa, Tau Beta Pi, and Pi Tau Sigma. He participated in a co-op with the Naval Research Lab in the area of materials science and was a fellow in the National Undergraduate Fellowship Program in Plasma Physics and Fusion Engineering - TOKAMAK fusion test reactor at the University of Wisconsin. He was a recipient of the Benjamin C. Cruickshanks Award, Golden Key New Member Scholarship, and an Outstanding Academic Achievement Citation.

JAMES CHEEKS

James Cheeks, a music major, could be seen regularly during basketball season playing the national anthem prior to home games. In addition to the saxophone, he studied piano, violin, viola, flute, and clarinet. Among his more noteworthy performances was playing jazz for President Vaclav Havel of the Czech Republic, motown for President Clinton at his Georgetown class reunion, recording with Upper Room COGIC Church, and recording "Don't Give Up" with the Island Records Inspirational All-Stars. "Don't Give Up" appeared on the "Don't Be a Menace to South Central While Drinking Your Juice in the Hood" movie soundtrack.

CORY D. KNUDTSON

Cory Dane Knudtson, a mechanical engineering major, was a founding member of the GW Solar Car Project. From 1992 to 1994 he led the Advanced Composites Group that designed and manufactured the the outer body and chassis of their first car, Sunforce One. As Project Leader from 1994 to 1996 he coordinated the procurement and production process that involved working with over 100 companies throughout the world and over \$250,000 of donated services and materials. He was also a mechanical engineer trainee on the Clementine I Deep Space Program Science Experiment at the Naval Research Lab.

Cory was also active in the Engineer's Council and the SA Academic Affairs Committee. He was named the Outstanding Sophomore by Tau Beta Pi, of which he was also a member, the Distinguished Scholar of his graduating class, and recipient of the George Ellowitz Prize for broad interest in the humanities or social sciences.

SOON HUAT ANG

Soon Huat Ang, a computer engineering major, was treasurer of Tau Beta Pi and a member of Eta Kappa Nu and Golden Key. A recipient of the Benjamin C. Cruickshanks Award in computer engineering, he also worked as a peer tutor in the School of Engineering.

MAGGIE Z. MILLER

Maggie Z. Miller, a communication major, was a four year letterwinner on the women's soccer team. A starting defender, she was named to the A-10 Academic All-Conference team each year while at GW, was an A-10 Player of the Week in October 1995, and finished her final season ranked second in all-time assists in GW women's soccer history. Her senior thesis on awake surgery was accepted to the Speech Communication Association Conference in the fall of 1996. She was an undergraduate teaching assistant in the Communication Department and volunteered at Natural Day Care, taking care of kids and teaching classes. She received third place in the Issac Davis Speech Award for outstanding seniors.

LEAH ROSEN

Leah Rosen, a marketing major, served as president of the Panhellenic Association, president and vice-president of Sigma Delta Tau, and was a member of the Dean's Advisory Council for Greek Affairs. She received the Dean's award for superlative achievement for her contributions to Greek life.

*Happy Anniversary GW
Riggs Celebrates*

*175 Years
+160 Years
SUCCESS*

The Riggs National Bank is celebrating its 160 year as the best known and most important bank in Washington, D. C. For well over a century Riggs has served the most important people in the world . . . presidents of the United States, other historical figures and you. along the way we have participated in significant historical events such as financing the Alaska Purchase and the North Pole Expedition. Today, we provide the same high caliber service to our customers and we need the right team to help us do it. If you are looking for a bright career in the financial services industry and are accustomed to working with a winning team, Riggs is the place for you.

We invite you to send your resume with salary history to:

*Riggs Employment Office
1120 Vermont Avenue, N. W.
Washington, D. C. 20074 or fax to (202) 835-6098*

To hear about many exiting career opportunities with Riggs, please call the Riggs Career Bank (202) 835-4400.

Each week, 10,000 drivers switch
their car insurance to GEICO. But there's
always room for one more.

If people suddenly flock to a new movie or a restaurant, it's probably worth checking out. Well every week, 10,000 drivers do more than check out the rates and 24-hour service offered by GEICO Auto Insurance. These **10,000 drivers switch.**

So you have to wonder what you're missing. For starters, one 15-minute call to GEICO could save you 15% or more on

A 15-minute call could save you 15% or more on car insurance. 1-800-841-3000

car insurance. You'll even get a **line-by-line comparison** with your current policy so you can see the savings. In fact, we reward new customers with **millions of dollars in savings.** And because we value the long-term relationships we build

with our policyholders, we offer **renewal to over 98%** of them every year. But here's where GEICO really excels. While any insurance company can answer your questions or update your policy, how many can do it *after* the 11 o'clock news? That's the beauty of GEICO's **complete 24-hour service.**

You can conduct any business anytime.

In many cases, your claim can be **settled within 48 hours** of reporting the details of an incident. So call GEICO at **1-800-841-3000.** We'll always make room for sensible drivers. Particularly drivers who are sensible with their money.

GEICO
The sensible alternative.™

CONNECTIONS... That's what makes the George Washington University/Price Waterhouse relationship so special. The many ties that bind our two organizations are deep and longstanding. ■

As independent accountants and business advisors since 1956, we have worked alongside successive generations of management to contribute to the vibrant organization that is GWU today. ■ Through **PW's University Career Placement** programs, PW recruits GW students for employment. More than 100 GWU alumni, including 17 partners, work for PW. GW students participate in the PW accounting internship program; PW is active in GW accounting campus activities; and PW offers a GW student scholarship. ■ PW also contributes to GW's strong record of community service, including sponsorship of the annual **Harvest Moon Classic Run** to combat breast cancer. ■ Other connections we share with GWU include participation in the **GW health plan**, donation of art to the University, and the **PW Foundation**, our contribution matching program for GW alumni who work for Price Waterhouse. ■

WE ARE PROUD OF THE MANY CONNECTIONS BETWEEN GW AND PW AND OUR CONTRIBUTION TO THE SUCCESS OF THE UNIVERSITY AS IT CELEBRATES 175 YEARS OF EXCELLENCE.

CONGRATULATIONS TO THE CLASS OF 1996.

CONGRATULATIONS SEAN,

IF YOU HAVE ANYTHING REALLY
 VALUABLE TO CONTRIBUTE TO THE
 WORLD, IT WILL COME THROUGH THE
 EXPRESSION OF YOUR OWN
 PERSONALITY - THAT SINGLE SPARK OF
 DIVINITY THAT SETS YOU OFF AND
 MAKES YOU DIFFERENT FROM EVERY
 OTHER LIVING CREATURE.

LOVE,

Mom, Dad, Steve, Kevin and Tom

*A flower is bloomed
Exactly like a new day
Take care of them both.
Catherine Henry 1983*

*You are our flower
Your bloom is beautiful
This is your new day
Take care of them both.
Congratulations & Love
Mom & Allyn
Greg & Family*

**FOR OUR SON
AND BROTHER
CHARLES IAN KEVIN
SPARKMAN,
KEEP YOUR SENSE OF
HUMOR,
SO YOU MAY BE SERIOUS,
YET NOT TAKE YOURSELF
TOO SERIOUSLY;**

**WE WISH YOU WISDOM,
COURAGE, MODESTY,
HONESTY
AND LOVE ALWAYS.**

CONGRATULATIONS!!

Dear Daniel,

We remember your preschool graduation as though it was yesterday and are filled with pride and love as we share this most important milestone. Congratulations on your outstanding academic achievements and exceptional personal accomplishments.

The world awaits your talent, imagination, intellect passion and humor. May all your dreams come true. Nothing will ever be beyond your reach.

With all our love and admiration,

*Mom and Dad
 Jen and Brian*

CONGRATULATIONS ALAN

FROM YOUR GREATEST FANS

**MICHAEL, WE WERE
 PROUD OF YOU THEN,**

**WE ARE STILL PROUD
 OF YOU NOW.**

OFFICE OF

CAMPUS LIFE

Campus Activities • The Marvin Center • Residential Life • Community Service

While you've been studying at GW, we've tried to help you in many ways.

We've provided you with a place to live, found fun things for you to do – and even given you a place in which to do them.

More importantly, we've supported your academic pursuits, provided opportunities for leadership experience, and have encouraged your community service interests.

Now that you're moving on, we would just like to say...

The
Office of
Campus Life

EXCELLENCE IN
STUDENT LIFE
AWARDS

FAMILY
WEEKEND

The Office of Residential Life and the Resident Hall Association wishes to thank the 1996 graduates For making 1996 so memorable —

- The 30th Annual Martha's Marathon raised over \$20 K
- Dedication of the J William Fulbright Hall
- 1st Annual Thurston Block Party
- Annual RHA Chili Cook-off
- Superdance for MDA

Campus Activities wants to thank the 1996 graduates of GW for their support throughout the year. We wish you all the best of luck!

CI

NIGHT
IN THE
MARVIN CENTER

OCL THANKS YOU FOR YOUR CONTRIBUTIONS!

SUMMER SERIES

WELCOME WEEK

The Marvin Center is proud to have been the host of some incredible events over the past year. From events like CNN's "Crossfire" to addresses by Secretary of Energy Hazel O'Leary, we hope that we have made a difference in your life at GW through the events we host, the services we supply and the opportunities we provide.

TO OUR LITTLE STAR: JENNA JONES

**TWINKLE, TWINKLE LITTLE STAR, WE ARE SO PROUD OF
 WHERE YOU ARE.**

**UP ABOVE THE CROWD SO HIGH, YOU ARE OUR
 DIAMOND IN THE SKY.**

**YOU HAVE POWERS YOU NEVER DREAMED OF, YOU CAN
 DO THINGS YOU NEVER THOUGHT YOU COULD DO.**

**THERE ARE NO LIMITATIONS TO WHERE YOU CAN GO OR
 WHAT YOU CAN DO.**

**BE PROUD OF WHERE YOU ARE AND WHAT YOU HAVE
 DONE AND BE EXCITED ABOUT WHAT YOU WILL DO.**

**WE ARE SO PROUD OF YOU AND WILL ALWAYS BE THERE
 FOR YOU.**

GARY,

YOU SURPRISED US 22 YEARS AGO
 AND HAVEN'T STOPPED.

MAY YOUR LIFE BE FULL OF
 "FANTASTIC MOMENTS."

WE ARE SO PROUD OF YOU.

CONGRATULATIONS.....

Mom, Dad, Amy, Cindi & Ken

DEAREST AMY,

CONGRATULATIONS ON THIS
OUTSTANDING ACHIEVEMENT,
WHICH WE KNOW WILL BE A
STEPPING STONE TO YOUR
FUTURE.

MAY YOUR BEAUTY, WARMTH
AND CARING SERVE AS A
BEACON TO GUIDE YOU ALONG
LIFE'S PATH AND FUFILL ALL
YOUR CHERISHED DREAMS.

WITH ALL OUR LOVE,
Mom, Dad, Stuart & Grammy

CHRISTINA M. COTA

YOU HAVE WORKED VERY HARD TO GET
WHERE YOU ARE. YOUR LOVE FOR
GOD, YOUR CHILDREN, AND YOUR
FAMILY HAS BEEN A GUIDING BEACON.
WE PRAISE YOUR ACCOMPLISHMENTS
AND ENCOURAGE YOU TO CONTINUE TO
PURSUE YOUR DREAMS AND FUFILL
YOUR POTENTIAL.

WITH LOVE,
Your Parents

SA Executive Branch 211

WE WISH YOU...
YOUR HEART'S DESIRE...
CONTINUE TO FOLLOW
YOUR STAR!

WITH FAITH, HOPE & LOTS OF LOVE ALWAYS!
MOMMY, CHARLES & ALL THE FAMILY

DEAR SCOTT,
FROM BEING A SPECIAL CHILD, YOU
HAVE BECOME AN EXCEPTIONAL YOUNG
MAN. YOU HAVE ALWAYS MADE US
PROUD AND WE KNOW YOU WILL
CONTINUE TO DO SO.

WE LOVE YOU VERY MUCH —
*Mom, Dad, Marc, Grandma Renee,
Grandma Molly and Grandpa Sol*

THE WORLD IS OUT THERE
JUST WAITING FOR YOU,
LORABELLE!

WE LOVE YOU MORE THAN
ANYTHING IN THE WHOLE
WIDE WORLD.

Mom, Dad, Lisa, Mindy & Grandma

P.S. DADDY IS READY TO COLLECT HIS 10%.

CONGRATULATIONS MAURICE!

ON THE WINDING ROADS OF LIFE
 WHERE ONE MAY EXPERIENCE STRIFE
 WANTING ONE'S DREAMS TO COME TRUE
 IT MAY SEEM IMPOSSIBLE TO YOU.
 NEVER GIVE UP ON SUCCEEDING
 CONTINUE TO WORK HARD AND NEVER
 STOP BELIEVING

Nadia M. Murdock (Sister)

WE LOVE YOU AND
 WISH YOU A HAPPY &
 SUCCESSFUL FUTURE.
Mom, Dad, and Nadia

MARCY B. KATZ CONGRATULATIONS!

WE ARE VERY PROUD OF YOUR DOUBLE
 MAJOR, YOUR SCHOOL ACTIVITIES, AND
 HOW WELL YOU ACCOMPLISHED IT ALL!

LOVE,
Mom and Dad

KATHLEEN HARMER -

YOU ARE BEAUTIFUL! I'M SO
 PROUD OF YOU AND I LOVE YOU
 VERY MUCH.

CONGRATULATIONS -
 LOVE,
Mom

Karla —

**You have been a blessing since
even before your birth
You have filled my heart with
contented love and mirth.
You have filled my days with
memories we can share.
Through every passing year—I've
thanked God you were there!
I see you grown up now, and my
heart bursts with pride.
My joy in your accomplishments,
I really can not hide.
I am awed by your beauty and
heart-filled caring grace,
the smile and glow of warming love
that shines in your face.
Your soul is full of compassion—
a gift from God above.
You are precious, creative, intelligent,
kind and very easy to love!
I wish for you the very best as you
travel on through life.
I hope you are richly blessed in
your career and as a wife.
I hope happiness surrounds you and
fulfillment comes your way
and you continue to grow in knowledge
and love, each and every day.
I LOVE YOU!**

Mom

My sister, My Love,

Always my inspiration, my courage, my example, and most of all my constant friend. From swimming lessons and river rides, to desert walks and mountain hikes, we've been there for each other. I love you and wish for you everything you want.

Love,
Dacia

Karla (my sister),

I think you are pretty
I think you are neat
I think you are funny
I think you are sweet

I think that you're you
and that's all you need to be
because I'll love you forever
and I hope you'll love me.

Love,
Andrew

To the most Dear, Sweet, And Wonderful Friend I know, Karla,

I still remember vividly the day that we met. It is a very special day to me! The reason for that is, I met someone who would change my life forever. I am very thankful for that! You have brought so much into my life. You are so sweet, caring, loving, thoughtful, and intelligent. I thank God for such a wonderful blessing.

I am very glad that you chose to get married before you finished your college education. I know we've had some tough times. The thing is, I truly love you and it would have been hard, for me, to be so far apart for so long. I, however, would have waited forever and a day to make this dream come true.

I can't express how proud I am of you for your many accomplishments such as grades, honors, friendships, and awards. I know you work very hard at your classes and are very dedicated to making high grades. I would like to add that your grades are very outstanding. The thing that I'm most thankful for, though, is the fact that you put our relationship first. For that I really admire you. I think you are a most wonderful wife and a great scholar! That is why I want to congratulate you on your graduation and wish you the very best in all your future endeavors.

All My Love,
Bryan

Dear Karla,

Precious memories spring as I play back being your father—the miracle of birth, unutterable joy and marvel, God's gift, so beautiful. Tenderly caring and loving you. Sharing life—hugs, kisses, rocking, feeding, bathing, singing, diapers, doctors' visits. Watching you grow, holding your hand, and letting go. Watching you run and play, and laugh and cry. Rejoicing as you look toward heaven with both questions and faith. Meeting new friends, recognizing the human and divine in each. Your love and commitment in marriage. And now excelling and graduating at G.W. Praise God for you, and blessing you with gifts you are choosing to grasp. I am so thankful to be your father and share in your life and dreams. And I pray God will be with you in all that lies ahead.

I love you,
Dad

Photography

Senior portraits were taken by Thornton Studio of New York City, NY. Underclassmen photos were shot by the staff on 35MM film. Moments were captured by the staff using Fuji SuperG film in speeds from 100 to 1600ASA.

Photo reproduction

Photos were scanned for reproduction by both the staff and the factory. Taylor used a Linotype-Hell TOPAZ scanner and the staff used a Linotype-Hell SAPHIR scanner. Both scanners were driven by Linotype-Hell LinoColor software. The staff used ColorSync 2 color management software.

directly to film at 3386 dpi and 150 lpi.

Software

Artwork was designed with Adobe Illustrator 5.5, 6.0, TextureMaker 1.0 and KPT Vector Effects. Photomanipulation not involving color correction was done with Adobe Photoshop 3.0. Color correction of photos was done in Linotype-Hell LinoColor 4. Pages were composed with Pagemaker 6.0.

Typography

All typefaces in the book are from the Adobe and Linotype font libraries. The primary copy face is Minion Multiple Master 367wt 585wd 11op.
